# Union Carbide Says 1982 Probe Found Flaws in India Plant

By Thomas J. Lueck New York Times Service

DANBURY, Connecticut -The Union Carbide Corp. said that The Mark of the a 1982 inspection of its pesticide plant in Bhopal, India, revealed serious equipment and safety prob-lems but that its Indian subsidiary had rectified most of the problems

One of the problems remaining in June, the company said, involved the adequacy of a valve on a tank used in producing highly toxic gas. The valve was designed to cope with "a runaway reaction."

The gas, methyl isocyanate, was released from the plant on Dec. 3,

A chronology of the Bhopal gasleak disaster reveals confusion and contradictions.

spreading across the city and killing more than 2,000 people, ac-cording to official counts, and as many as 2,500, according to other

A company spokesman said late Monday that he did not know whether the release valve had been replaced or repaired before the accident last week. But the spokesman, Ed Van Ben Ameely, said "we have no reason to believe" that the work was not completed.

Inspectors at the Bhopal plant, performing what they called an operational safety survey at the plant in May 1982, found 10 major deliciencies, the report said. It was released Monday by Union Carbide.

5 Guilty of Smuggling Arms to IRA

DUBLIN (Reuters) — An Irish court found five men guilty on
Tuesday of trying to smuggle seven tons of arms and ammunition by sea
from the United States to the Irish Republican Army.

WORLD BRIEFS

ROME (AP) - At least 50 underworld suspects, including two Sicilian

udges and a Rome police colonel, were arrested Tuesday in a new

nationwide anti-Mafia crackdown, authorities said. In the northern city of La Spezia, police also arrested six relatives of Gaetano Badalamenti, a

reputed Mafia leader recently extradited to the United States, the Italian

Police said more than 300 arrest warrants were issued by Francesco

Scardulla, a Turin prosecutor. Many of the suspects were still being sought or were already serving jail terms. The police raids in Reggio Calabria, Catania, Rome and Turin marked the largest anti-Mafia operation since the confessions of Tommaso Buscetta, a Mafia leader, led police to more than 60 arrests in September.

police to more than 60 arrests in September.

The two judges taken into custody in Catania were identified as Pietro Perracchio, president of the local court of assize, or trial court, and Aldo Rocco Vitale, president of an appeals court. A paramilitary police colonel, Serafino Licata, who served in various key posts in Sicily for nearly 15 years, was arrested in Rome, police said, Investigators in Turin said the arrests could lead police to solve at least 30 Mafia-related

news agency ANSA reported.

Dublin's Special Criminal Court imposed 10-year sentences on three of the men, who were aboard an Irish trawler, the Marita Ann, when it was seized by the Irish Navy on Sept. 29. One was a former U.S. marine from Chicago, John P. Crawley. Ten-year sentences were also given to Michael Browne and Martin Ferris. Two others, John McCarthy and Gavin Mortimer, who said they had not known of the operation before boarding

Mortimer, who said they had not known of the operation before boarding the boat, received five-year suspended sentences.

The trawler, which was approaching Ireland's southwest coast, was carrying 90 rifles, six machine-guns, 34 revolvers and 70,000 rounds of ammunition. Justice James McMahon, the court president said, "Had these arms been successfully transmitted to their destination, it is impossible to conceive the amount of suffering they might have caused."

### Reuters had been taking part in protests policemen have admitted killing OSLO — Bishop Desmond and 6,000 blacks are sacked for him and a fourth will be charged with instigating the crime, according to Polish authorities. Mr. Walesa, the winner of the Mitterrand Defends Chad Withdrawal

BUJUMBURA, Burundi (AF) — President François Mitterrand told African leaders Tuesday that France has no mutual defense agreement with Chad and therefore has no obligation to help liberate northern Chad 1983 Nobel Peace Prize, sent a message of congratulations to Bishop Tutu, inviting him to visit him at from a reservoir on Oct. 30. Three his home in the Baltic port of Polish Interior Ministry security Gdansk, an aide said Monday. from Libyan military occupation.

Addressing the opening session of the annual summit meeting of France and its former French African colonies, Mr. Mitterrand said that France had defense agreements with many African countries, and if any of them were the victim of external aggression, these agreements "will be totally carried out."

He added that France had only a military aid agreement with Chad and decided last year to send a task force there "because we remain faithful to a global concept of equilibrium in Africa and particularly in sub-Saharan Africa." France has been criticized privately by several of the 36 African countries at the summit for its unilateral military pullout from Chad last month despite a Libyan failure to observe a mutual withdrawal agree-

### CBS Lacked Objectivity, Attorney Says By M.A. Farber

i sw York Times Service

NEW YORK - In an effort to show that CBS was not objective in preparing its disputed documentary on the Viennam War in 1981, lawyers for General William C. Westmoreland have questioned the program's producer about his reasons for not interviewing a number "of high-ranking officials.

Dan M. Burt, General Westmoreland's principal attorney, sought Monday to illustrate that George Crile, the producer, and his colleagues feared that the officials would contradict the documentary's premise of a conspiracy by mil-litary intelligence officers in 1967 to minimize the strength of the ene-sertion on the broadcast that Gen-

itself as sponsor and sanctuary of the community of Islamic radicals from which this particular gang was apparently drawn. Terrorists of whatever stripe need help and a home. They need a place in which to plan their crimes, a place from which to get the money and the guns and a place to escape to afterward.

Revolutionary Iran has inspired, set up and guided the principal groups of terrorists now active in the Middle East. The group that kidnapped the Kuwaiti airplane was trying to spring 17 Iranian-linked Iraqis jailed by Ku-wait for bombing the U.S. and French embasies last year. In two recent episodes in which planes were pirated to Tehran, Iran apparently set the skyjackers free. Without Iran, terrorism in the area now would be the work simply of hip-pocket operators and lone crazies.

It follows that the most effective way to tight terrorists is to deny them a quiet place in which to make ready and hide. How? Military attacks on the perpetrators or their patrons may have their uses in certain circumstances, although, as the Shultz-Weinberger debate on the issue is tending to show, those circumstances are likely to be few. Political action against the gunmen and their seconds should

The single reason why the latest hijacking could (ake place is that Iran has established tion. Intelligence must be shared and the expectation created that in a crisis all other countries will close ranks. Publicity and denunciation can help. In the latest incident, various pressures applied by governments that Iran is interested in cultivating seem to have helped incline the authorities in Tehran to limit the damage somewhat. But this was not done in time to save the lives of two Americans and to prevent other innocents in the plane from being subjected to abuse and horror.

President Reagan has singled out Kuwait, praising its "firm stand" in refusing to buckle to the hijackers. Let us, too, praise Kuwait. Ten years ago Kuwait was the patsy for the Palestinians, who were in their hijacking phase. "Looking for a comfortable, safe place to escape to after your next multiple murder?" we inquired rhetorically after Kuwait had welcomed its fourth band of Palestinian killers in a few months. "Try Kuwait." But the Kuwaitis have in the interim accepted the stern obligations of good international citizenship. Last year they jailed the bombers and now they have stood up to the hijackers. For them the stakes are tremendous, vulnerable as they are to Iranian rage. They deserve immense respect. -THE WASHINGTON POST.

# Risk and Blame at Bhopal

Labor's Nuclear Triumph

It comes as a shock to be reminded from time to time that some of America's European "these Kremlin undertakings" and that he had

in Bhopal, technology has showed its grimmest face. The pesticide ingredient that burst from its storage tank in the Indian town is feared to have killed some 2,500 people. Many thousands more may be blinded or debilitated, perhaps for life. As the catastrophe bears witness, pesticide ingredients can be more deadly than the kindred agents of chemical warfare.

The detailed causes of the accident are still unknown, but a tragedy of such dimension prompts broader questions. Is the risk of such accidents too high a price to pay? Has techno-

logy outrun the capacity to control it?
Foresight is rarely perfect. Most safety records are built on a history of mistakes. Only when the risks are visibly enormous, as with nuclear power, are extreme precautions taken. Despite some close calls, the nuclear industry has had a fine safety record. So, too, has the chemical industry in America; its accident rate is the lowest of any, doubtless because the perception of hazard is so keen. Union Carbide says its plant at Bhopal is a smaller replica of one that has operated safely in West Virginia for 17 years. Why should America's safest industry prove so disastrous at Bhopal?

Part of the explanation may be a difference in culture. India's scientists are as good as any, but not all Indian workers have the same familiarity with machinery as Americans. Yet to gain foreign technology India has encouraged corporations to locate plants in India rather than sell to India from abroad.

No technology is wholly risk-free, and societies accept varying levels of risk. From nuclear power almost no deaths are acceptable, and rightly so; but for automobiles, a familiar and desired technology, Americans tolerate a carnage of 50,000 deaths a year and spurn extra safety measures. An air crash produces more bodies than a car crash, and people are willing to pay for greater safety on planes than in cars. The public insists on higher standards, as it would probably do for drugs or pesticides if their side effects were more concentrated.

The Bhopal plant was part of India's re-markably successful effort to shake free from the legacy of famine and foreign food handouts. No doubt the plant could have been made safer if anyone had foreseen the risk. Presumably Union Carbide used the cheapest process, which had worked relatively safely for 17 years. Extra safety would have meant extra cost. Should the company or its Indian coowners have decided the process used in West Virginia was too dangerous to transfer to India? In retrospect, maybe. But the usual approach would be to assume that the risks could be managed. That miscalculation may have contributed as much to the accident as any faulty valve or individual act of neglect.

Those caught in the gas cloud at Bhopal have paid in agony for a train of errors. In so extended a causal chain, blame may prove harder to fix than it might seem.

Labor's disarmament policy, up to now a dis

tinct electoral liability, into an asset.

- THE NEW YORK TIMES.

BERLIN — China's official attack on Marxist orthodoxy as outdated and a hindrance to needed reform was such a surprise to Soviet-bloc Communists that it left them speechless. The Chinese switch is a historic watershed that can have far-reaching, dramatic consequences.
The idea of a Communist Party criticizing Marx,

and Engels and Lenin as well, is so startling that several Eastern Communists at an Aspen Institute meeting last weekend insisted on ignoring it.

An important Polish official, asked whether the report would be published in his country's press, said no. Pressed for a reason, he said that Polish-Chinese relations were reasonably good now, and since publication would have to be accompanied by comment, it was better to keep silent.

But word of what Soviet-style Communists have

to consider a heresy is bound to spread and provoke a festering argument. Of course, Marxist scriptures have long been quoted and distorted by Communists to prove all kinds of contradictory points. But it was unheard of openly to admit the obvious fact that Marx's principles were about a totally different era, the early industrial revolution — even considering Beijing's subsequent softening declaration that they remained a guiding ideology.

The admission flies straight in the face of the assertion that Marxist precepts are proven know-ledge, "scientific materialism," and that Marxist forecasts of universal triumph are as reliable as predicting an eclipse - "historical inevitability." This Marxist myth is the only base for the claim of Communist hierarchies to legitimacy, to ideological superiority, to pie in the sky.

By Flora Lewis

Certainly, the sanctity of the texts is a handicap when it comes to adjusting to a changing world. It is a major reason why the Russians find it so hard to reform. But they cling to their dogma because they need it to justify their power. They are frightened of losing control without the ideological security blanket that covers their brute security forces. Given China's experiments with market and enterprise, it is perfectly logical, if breathtaking, for Beijing to say flatly that old shibboleths must

be brushed aside in thought as well as in practice. But it creates a terrible problem for Moscow. Soviet-Chinese relations have been improving. slowly but tangibly, and for geopolitical reasons i is in Moscow's interest to avoid a relapse into hostility. China's open defection on the ideological front, however, is bound to create new strains. Not even Yugoslav Communists have gone as far, al-though they admit that their system is not working and are desperately looking for ways to tinker,

without challenging central premises.

People in the Soviet bloc, especially Communists (many others long ago stopped believing that Marx was infallible), are bound to start asking some forbidden questions. If ancient, impover-ished China has found Marxism an obstacle to effective industrialization and development, why should the creed continue to be imposed on more advanced societies that have passed the rough initial stages that Marx described?

It is unseemly to gloat and point out that the

nearest thing in the world to the Marxist promise of a classless society is the most capitalist of countries, the United States, where almost every-body feels middle-class. There is an urge to chortle,

but the event is too important to be trivialized. This extraordinary Chinese candor is heartening because if there is any chance of it spreading to the Soviet bloc, the chances for peace and freedom are better than they now appear.

The Soviet Union and the United States are

adversaries in a classical great-power pattern, but also leaders of rival types of society. The political antagonism underlies the military confrontation. That is why the Soviet capacity for internal reform matters so much to the rest of the world.

If, as some American experts are convinced, serious reform is impossible, then Moscow will continue to feel deeply insecure and frustrated and therefore be threatening. If a new generation could be as open-minded as old Deng Xiaoping, a Soviet regime busily seeking domestic prosperity could reach an East-West accommodation that would allow everyone to breathe more easily.

Mr. Deng could make the leap because, al-though an old revolutionary, he had already been punished as a "capitalist roader" and his position does not rest on justifying the past. The current Soviet leadership could scarcely afford such audacity. It would mean accepting responsibility for what has gone wrong. But if Beijing's efforts succeed, the next Soviet leadership will have to take note. It is much too early to throw away arms, but for once there is some really good news.

The New York Times.

# Shultz: The Vacuum Cleaner Is Humming Again

WASHINGTON - George delegate responsibility, in arms intend to do that ... "

After the opening of talks with Mr. allies have opposition parties — old parties expressed the hope that they could convert control or regional hot spots, he will look to professionals in the State Department - not to superstars from outside. New appointments as ambassador to the United Nations and

The British, these days, do But a reading between the lines shows not have that comfort. The Labor Party not so that he is on the offensive in the

> heart of American government. Early in the interview Mr. Shultz was asked whether he would be spending more time on Soviet relations and arms control business. "I

> bureaucratic warfare that lies at the

have to." he replied. Then he said: "History certainly shows that the major political discussions of the subject have taken place above the level of the formal negotiations, and I accept the fact that that's probably very likely. We have said to Gromyko -president has said to Gromyko and to Chernenko, in effect — that this is a presidential-level issue. He By Joseph Kraft

Gromyko in Geneva next month to be sure, the secretary may have to pass negotiation of details to a lower level. But he wants an official clearly responsible to the State Department. Hence the designation of Paul Nitze as special assistant to Mr. Shultz.

Ambassador Nitze, who has considerable experience, had shared ne-gotiating duties with Edward Rowny, a retired general whose roots are in the Pentagon. If the Russians accept President Reagan's proposal for "umbrella talks," as seems likely, Mr. Nitze will be Mr. Shultz's man at the

head of a single American delegation. Mr. Rowny will be downgraded, as will Kenneth Adelman, the arms control director. While the Pentagon will still carry weight, Assistant Secretary Richard Perle will have to make his case without help from inside the

arms control community.

That same model asserts itself in two other areas once dominated by everybody but the State Department. In Central America, the Pentagon, the Central Intelligence Agency and a commission headed by Henry Kissinrecognizes that, agrees with that and ger were at one time all playing roles.

Mr. Shlaudeman has been meeting Nicaraguan officials regularly to try to square the security of neighboring states with the proposals of the four Contadora countries. Of Mr. Shlaudeman's mission, Mr. Shultz says: He knows more about the area than I do ... although there are times when I can help him a lot ... be-cause I have a little more clout."

In the Middle East, former Secretary of Defense Donald Rumsfeld was the chief negotiator between Israei and the Arab states. Previously that job had been assigned to such notables as Robert Strauss, a former Democratic Party chairman, and Sol Linowitz, the former Panama Canal treaty negotiator. Now Assistant Sec-

retary Richard Murphy, a career dip-lomat, quietly makes the rounds. The United Nations post lends it-self very little to full control by the State Department. The UN ambassa-dor has had cabinet status and a great theater for voicing personal views. Highly independent figures are being touted for the job that will be vacated by Jeane Kirkpatrick. They include Richard Stone, a former senator from

'reported directly to me."

The State Department has in mind strongly against verbal abuse by cide with those of the Reagan admin-Third World radicals. He is Vernon istration — up to a point. Walters, the linguist who served Presexander Haig and Mr. Shultz.

As to the assistant secretaries, Mr. Shultz saw room for improvement in three areas: international economic policy, dealings with international oranizations and participation in the intelligence community.

The assistant secretaries in those areas all came to State from compet-ing power bases. Richard McCor-mack, the assistant secretary for economic affairs, had worked in the office of Senator Jesse Helms. Greg moderate forces exist in Tehran by Newell, the assistant secretary for international organizations, came out

as the Vacuum Cleaner. After a sluggish start as secretary of state, the Vacuum Cleaner is humming again.

of the White House. Hugh Montgomery, the director of intelligence and arch, is a CIA veteran. A good bet is that all three will be leaving soon.

During the Nixon administration
Mr. Shultz was so skilled at bureaucratic warfare that he became known

Pressed for examples, he told of a Spanish sale of 155mm artillery shells to Iran - some 300,000, or the equivalent of six months' supply. When pressed by the Iraqis, the Spanish government said that the shells had been sold to Syria. When reminded that Syria, a close ally of Iran, has Soviet armaments that do not include 155mm artillery, the Spanish authorities apparently pleaded ignorance.

The Iranians bought hundreds of what were described as "civilian" (pleasure) boats from Japan — or so the Japanese insisted. Mr. Aziz insists that the boats were ideal for carrying Iranian troops through marshland into battle. When he asked the Japanese whether they thought Iran's mullahs were going to "take up water skiing" the Japanese, too, pleaded innocent, according to Mr. Aziz. The neutral Swiss sold the Iranians

what Mr. Aziz calls PC-7 jet training aircraft. When confronted by the Iraqis, the Swiss took the position that they are "civilian" planes Mr. A. they are "civilian" planes. Mr. Aziz says he was obliged to remind them that, when Iraq bought the same aircraft from Switzerland, they gave the name of a company that would fit the planes out with machine guns. Now you can argue that Iraq's

roughneck regime started the war for territorial gains. Another argument — the fallback position of Western arms suppliers when pushed to the wall — is that somebody is going to do it and that anyway there is some-Shultz plans to conduct most of the arms control negotiation with the Soviet Union himself. If obliged the Soviet Union himself. If obliged intend to do that ... "

Now the main negotiator in Central America is Harry Shlaudeman, a carrier foreign service officer and former foreign service officer and former foreign service of state, I would to see how the arms of moderate leadership. But it is hard to see how the arms of moderate leadership. If obliged intends to do that ... "

Now the main negotiator in Central America is Harry Shlaudeman, a carrier foreign service officer and former foreign service of state, I would to see how the arms of moderate leadership. But it is hard to see how the arms of moderate leadership. But it is hard to see how the arms of moderate leadership. If the control of the service of the service of state, I would to see how the arms of moderate leadership. But it is hard to see how the arms of moderate leadership. liners the means to press on.
There is the nub of Mr. Aziz's argua candidate who would be more disci-ment. That the argument is self-servplined, even while continuing in the ing takes nothing away from the fact Kirkpatrick tradition of standing up that his purpose and assessment coin-

Once thought to be on the ropes, ident Eisenhower as translator and Iraq has bounced back with the help became a roving ambassador for Al- of French arms. But its staying power, like Iran's, is in doubt. The difference is that Iraq seems to be more of a mind to negotiate a settlement, while Iran shows scant signs of abandoning its aim: the overthrow of the Sonni Moslem government in Baghdad. That regime's replacement by pro-Khomeini Shiites would create another center for the export of extremism and subversion in the region. That would seem to be reason

enough not to undermine whatever prolonging Iran's capacity to carry on the war. On this much, Mr. Aziz says, he got no argument from the Reagan administration. But U.S. pressure has not so far done much to stop the flow of Western supplies to Iran. Apparently the arms business is only business, even in countries sup-posedly alert to Iran's terrorist activities and professing to be working for an early end to a war that has taken upwards of 700,000 lives.

WARREN, Michigan — It gets hard to believe some of the stuff you read in the papers.
I'm talking about the American

editorial response to the recent de-cision by President José Napoleón Duarte of El Salvador to dismiss and sever the pension of Lieutenant Isidro López Sibrián. The lieutenant was part of the group that murdered my brother, Michael Peter Hammer, his AFL-CIO colleague, Mark David Pearlman, and the director of the Salvadoran Land Reform Institute, José Rodolfo Viera. In the circumstances, the con-

gratulatory chorus that has greeted Mr. Duarte's decision seems just slightly out of place. Since when is losing your job and pension considered the appropriate punishment for a triple murder? In fact, in the rush to embrace the

Duarte government, many Americans have chosen to ignore some of the more unpleasant truths about El Salvador. The State Department is embarrassed by the nearly fouryear failure to pursue the murderers of my brother and his colleagues, and so it seizes on any action by the Salvadoran government that reduces that embarrassment. But let us tell the truth. Let us acknowledge that the decision to fire this lientenant has more to do with public relations than with justice. The facts speak for themselves.

Lieutenant Lopez Sibrian did not act alone on Jan. 3, 1981. He was

eating dinner at the Sheraton hotel

with a Captain Eduardo Alfonso

Avila, a Major Denis Moran and

two businessmen, Hans Christ and

The writer is shop chairman of a United Automobile Workers local. His brother Michael was murdered in El Salvador in 1981.

By Frank Hammer

Ricardo Sol Meza. After their wives left for the hotel disco, Captain Avila and Mr. Christ went to the parking lot with Lieutenant Löpez Sibrian, where they recruited two corporals as triggermen. Mr. Christ led the two soldiers across the lobby and pointed out the table where the three labor officials were sitting. The gunmen then opened fire.

Not a big deal in El Salvador, really. Just three more victims of an army and a business establishment that the Reagan administration insists on portraying as dedicated to progress, justice and reform. Again say, let's start telling the truth Another part of that truth is that

the land reform project the three men were working on is dead, too. A truly progressive land reform program must be enacted if there is to be any chance for ordinary Salvadorans to improve their standard of living. Yet the prospects are hardly promising.

The problem is that President Duarte is fundamentally beholden to the landholding aristocracy and the army. He challenges them at times, as with his initiative for talks with the guerrillas, but now it seems that the right is intent on sabotaging those negotiations, and Mr. Duarte has neither the will nor the power to stop them. Instead what we get is empty gestures like the

firing of Lieutenant López Sibrián. When you add it all up, you can understand the growing opposition in the American labor movement to the Reagan administration's plans for Central America.

affirmed its commitment to a resolution against military aid that calls for justice in the murders and also progress in land reform. It would be a bloody stain on the memory of three dead men if the project for which they gave their lives became just another inconvenient Salvador an reality that the State Department would rather forget.

choose which reality serves us best. The State Department can't call for justice on the one hand and indirectly support the death squads on the other. Congress should do what it did in the case of the four churchwomen murdered in El Salvador in December 1980: Put conditions on the aid that we send to El Salvador, In the nuns' case, 30 percent of

one year's appropriations was held up until a verdict was reached. A similar percentage would no doubt prod the Salvadorans into taking action now. In this case, let's add the provision that a verdict on the triggermen alone will not be sufficient. Let's not just ask who pulled the trigger, but who bought the bullets and who gave the instructions. Our taxes are buying lots of bullets for the Salvadoran army. One of them killed my brother. It's time that we made use of our power to end the killing in El Salvador. The New York Times.

LETTERS TO THE EDITOR Senate Down, House Up Two weeks ago the AFL-CIO re-In response to the report "Senate Foreign Panel's Prestige Is Fading" (Nov. 28) by Leslie H. Gelb:

observations to Mr. Gelb's perceptive and excellent report on the decline of the Senate Foreign Relations Com-The point is, we can't simply

mittee and the emergence of the House Foreign Affairs Committee. One aspect of the declining influence of the Senate committee has been its complete ineffectiveness in stanching the flow of unqualified political appointees to ambassadorial posts around the world. In the last several years the Senate panel has submissively given its consent to the appointment of men who could not even identify the capitals or the leaders of the countries to which they were being accredited.

The inability of the Senate com-

mittee to effectively exercise its "ad-vice and consent" responsibilities (quietly or publicly) has been a growing source of concern to members of the foreign service community. As the Senate committee has let its power slip through its fingers in this area, it has marred its prestige among many of the foreign affairs professionals with whom it has to deal. Second, the House Foreign Affairs Committee has emerged as an increasing force because of the rapid rise of a new generation of House members who have taken a deeper

# China: A Picture Worth Many Names

# Zhangs and Wangs Have Character but Lack Characters

By Christopher S. Wren New York Times Service BELIING - A hundred million Zhangs live in China, so many that

if they declared independence, they would add up to the seventh most populous country. Zhang, in fact, was thought to be

the world's most common surname. But the Beijing Daily said recently that there might be even more Wangs than Zhangs. A national survey of 174,000 Chinese, the newspaper said, turned up an unexpected number of Wangs. What's in a name? A lot more in

China than in the West, according to Chinese, who say they find Western names dull. By contrast, Chinese find their own names alive with nuance, and yet so limited in variation as to make it hard to keep track of who is who.

Instead of a phonetic alphabet. written Chinese uses ideograms, characters representing an object or an idea without expressing the sounds that form the word. Just as the active vocabulary of an English speaker is likely to consist of only a fraction of all the words, the number of characters in common use is a year ago that too many Li's were around 3,000, out of an estimated given the first name of Shuzhen (Fair and Precious). It said 4,800

Even fewer characters are used as family names. A study of municipal records in Shanghai found only 408 monosyllabic surnames. Virtually all Chinese family names consist of a single character.

The repetition of surnames in Chinese is so great that the Chinese term for the man in the street is "hobaixing." or "Old Hundred Surnames." A survey of 124,000 Beijing residents showed that an inordinate number were named Zhang, Wang, Liu or Li.

China's problem with names is compounded by fashionable trends in choosing given names, which are usually made up of two characters. In pre-Communist China, a village name-giver sometimes chose a character from a classical poem as the first character for a generation of siblings, making it easier, at least locally, to know who was related to

whom. The names usually implied fortune, intelligence or filial piety for boys and beauty or femininity for girls. After the Communist takeover in 1949, many babies were given revolutionary first names. So

Sudanese Leader Visits China

United Press Internation BEIJING - President Gaafar Nimeiri of Sudan began a five-day visit to China Tuesday for talks with Chinese leaders aimed at enhancing the "existing amicable ties" between the two governments.

many children born in 1949 were called Jianguo (Found the State) that anyone with that given name is likely to be 35 years old.

When China joined North Korea United States) or Yuanchao (Help Korea).

The Cultural Revolution of 1960 to 1976 brought an onset of radical names. A common component of given names in Beijing used to be Shu (Fair) Xiu (Beautiful) or Yu (Jade). During the Cultural Revolution, Jun (Army) or Ying (Hero) was popular.

In view of changing political moods, some Chinese have been changing their given names. After 1949, some people sought to rid themselves of names that sounded too patrician and not sufficiently proletarian.

A revolutionary name, Weidong (Safeguard the Orient), has become embarrassing because in a pun it also alludes to Mao Zedong, whose image is undergoing calculated ne-

The Guangming Daily lamented people named Li Shuzhen were liv-ing in the Manchurian city of Shenyang. So were 4.300 people named Wang Yulan and more than 3.000 named Wang Wei.

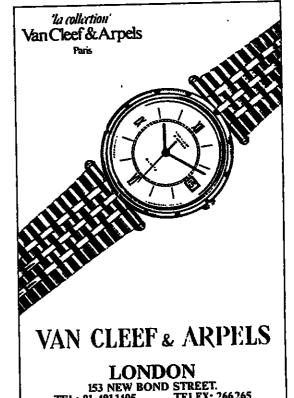

Such people get informally assigned descriptive nicknames like "Old," "Big" or "Little." In one Shenyang factory, the 10 employees named Li Wei are distinguished in the Korean War, some babies as Long-Haired Li Wei, Big-Eyed were named Kangmei (Resist the Li Wei and so forth, the Guangm ing Daily said.

Earlier this year, Liberation Daily in Shanghai published a lively exchange of letters on the issue of names. One reader, Chen Genming, proposed that a name-selection guide be published and that a name advisory board be set up with a computer to tell parents how often a name under consideration got

Another reader. Zhang Zaifang. suggested that surnames combine the names of the father and mother. making them disyllabic.

This prompted Mr. Chen to reply that such a practice might give rise to a geometric expansion of names until they grew unmanage-able. Mr. Chen said the answer was to add yet another character to the surname and given name in what he called a "stylistic" name.

Actually, the opposite is now occurring. A young father spent six weeks agonizing over a name for his baby son because the current trend is to bestow a given name of a single character on children because it sounds modern to Chinese

# Yugoslav Trial Is Seen as Effort to Limit Debate

By Bradley Graham

Washington Post Service BELGRADE — As a major po-litical trial of six Yugoslav intellectuals continues, observers say that it may signal the start of a wider attempt to silence dissent.

The intellectuals face jail terms of five to 15 years on a charge of organizing "an illegal hostile group" aimed at undermining the system and abolishing the govern-

Those on trial are Vladimir Mianovic, 38, an unemployed sociologist; Miodrag Milic, 55, a freelance scriptwriter; Dragomir Olujic, 35, a radio station publicist; Gordon Jovanovic, 23, a student; Pavlusko Imsirovic, 36, a freelance translator, and Milan Nikolic, 37, a sociologist

. [The trial adjourned on Tuesday for two days due to the illness of a lawyer, The Associated Press reported from Belgrade.]

Many Yugoslavs and Western observers view the state's case as weak and a political blunder. Some government officials confess privately to being embarrassed by the roceedings.
The indictment is vaguely word-

ed and the trial, which began last month, has produced nothing yet to substantiate the severe allegation against the accused. Some in Yugoslavia's Commu-

nist leadership are known to have opposed the trial. Its outcome still appears uncertain. The purpose of the trial, accord-

conditions of prolonged austerity and persistent inflation. Sharp debate over the need for economic and political reform of Yugoslavia's decentralized system has already broken out within establishment ranks. Unable to check the discussion or to turn the economy around, party officials are believed to be moving against the dissidents to show at least the limits of debate

and to reassert some authority. The intellectual community has rallied behind the Belgrade Six, vig-orously protesting the trial. Intellectuals fear that the case could become the first in a series of political trials. The crackdown has soured the mood among Belgrade's intelligentsia, who had enjoyed growing freedom of expression after the death in 1980 of President Tito, the founder of the modern

Yugoslav state. That the trial is being held in Belgrade, the capital of Serbia as well as of the Yugoslav federation, is significant. It supports a widespread impression that a coordinated squeeze is being put on the relatively tolerant Serbian leadership by the hard-line republics of Cro-

atia and Bosnia. internal power struggle in this oneof political reform and economic restructuring.

So far, the Reagan administra-tion has remained publicly silent about the Belgrade trial. But the ing to informed Yugoslav and diplomatic sources, is primarily to an observer to the trial each day as curb potential unrest arising from a sign of concern.

The United States orchestrated a Western effort last year to reschedule Yugoslavia's large hard-currency debt and to provide additional financial aid. U.S. officials are keen to shore up Yugoslavia's stability as a nonaligned buffer state bor-dering the Soviet-led Warsaw Pact.

Western reporters, meanwhile, have given the trial a lot of critical attention. This seems to have surprised the Yugoslav authorities, who had not expected such interest in a group of minor dissidents. Amnesty International, various watch committees and the American Bar Association have sent observers to

U.S. officials estimate that there are between 600 and 800 political prisoners in Yugoslavia, most of them accused of some form of "hostile propaganda." The charge leveled against the Belgrade Six association aimed at hostile activity -was previously reserved generally for those urging separatism in Croatia in the early 1970s and in Albanian-speaking Kosovo since

The crackdown in Belgrade began April 20, when police raided an apartment where people had gath-Handling of the Belgrade case is ered, reportedly to discuss Yugo-being watched as a barometer of an slavia's nationality problem. The 28 persons present were detained. party nation over the future extent Milovan Djilas, the veteran dissident who was one of Tito's closest associates before being dismissed from the party 30 years ago and jailed for nine years, was there to lecture on the country's tangled

1981.

The police action threw a spot-

weeks for the past seven years. Discussion topics dealt not only with economics and politics but

ranged as far afield as sports, com-puters and Zen Buddhism. Dissidents have charged that several of those detained in April greater democracy. were beaten while in custody. One, Radomir Radovic, was found dead 10 days later. Authorities called the death a suicide by poison but some

friends say they doubt that. Later, six who had participated in the free-university sessions from time to time were charged with using the gatherings to conspire to overthrow the government.

A seventh, Vojislav Seselj, a lec-

turer in political science at Sarajevo University, was tried in July, also for "counterrevolutionary activity," and sentenced to eight years in prison. Last month, a Bosnian appeals court changed the charge to hostile propaganda and cut the jail term in half. The guilty verdict against Mr. Seselj was based largely on an unpublished paper proposing that Yugoslavia's six republics and two autonomous provinces be con-

solidated into four republics. Three of the six - Mr. Mijanovic, Mr. Imstrovic and Mr. Nikolic were student activists in 1968 and served jail terms in the early 1970s on charges of hostile propaganda or being accomplices in hostile activity.

For three of the six, nothing is specified in the indictment about what they did or said at the meetings they attended. Mr. Mijanovic

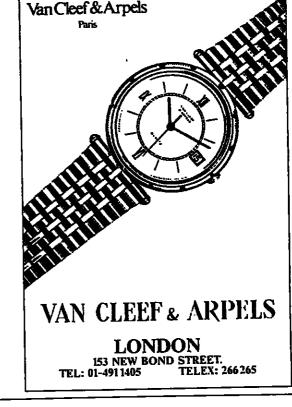

sent then. The indictment quotes excerpts of speeches made by Mr. Milic and Mr. Olujic at some sessions. One spoke of things Tito did in the 1940s, the other of a need for

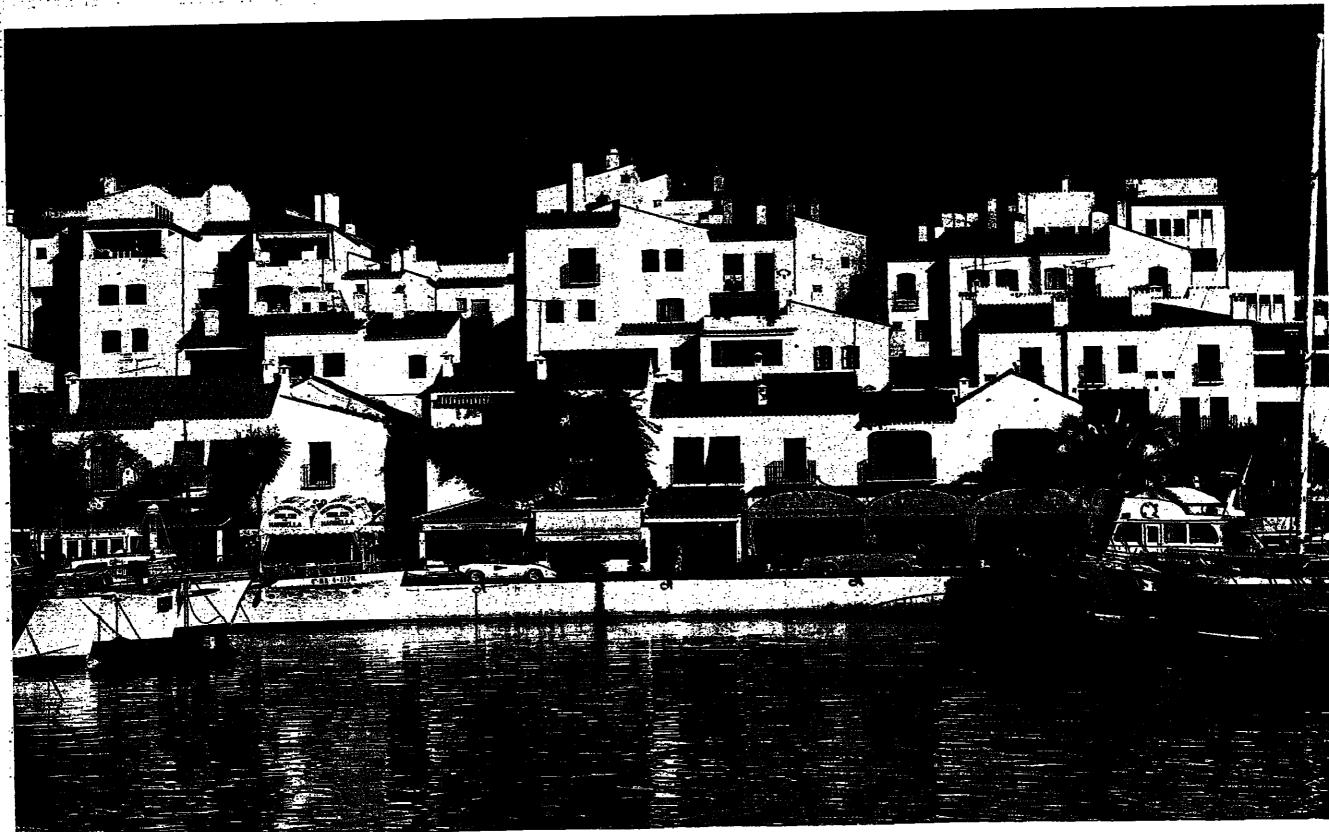

After the trial started, the prosecutor added a new count to the indictment implying sympathies among the six for Albanian separatists in Kosovo. This is an especially inflammatory allegation in Serbia, and the defendants saw it as calculated to smear them in the Yugoslav press. The count was based on a draft of an article found in Mr. Nikolic's apartment, written by a Briton and later published in the New Left Review, a theoretical Marxist journal subscribed to by 30 Yugoslav institutions, as Mr. Mi-

kolic pointed out in court. Although charged with a serious political offense, the six dissidents are not in jail. In an extraordinary gesture, the authorities freed them from detention in July.

In testimony, the accused have acknowledged taking part in the free-university discussions but say there was nothing secret or subversive about the gatherings, which they said were for cultural and intellectual enrichment, not the overthrow of the state.

Witnesses called so far by the prosecution have ended up siding with the defendants in court, denying damaging statements made earlier to interrogators who, they allight on a "free university" that had is accused of having set up the leged, had used coercion.

# How to actually enjoy February.

Of course, February can be fun if you like to ski. And you don't have to come to Spain for that. But what if you like to ski, and to play golf, and to sail, and you want to enjoy them all in the same holiday? You have to come to Spain for that. The weather's mild and sunny, and our play holes and keep your game alive until Spring weather comes to the north. The next day, an hour and a half's easy drive away,

you can forget your bad strokes while enjoying great

Of course. And suming, strolling, shopping and sighteeing. It's all here in Spain. One thing not to expect is peace and quiet. February is Carnival month, and in Spain that means fiestes and denoung everywhere, with colorful

costumes, parades and parties where you will be part of the fun. So put your dark, short February days behind you. Come to where the days are longer, the sun shines wighter and the music never stops. Come to Spain, where the greens are prassier.

Snain. Everything under the sun.

# Buttoning Up the Tale of the Teddy

By David Galloway

K EVELAER, West Germany— In his memoirs the English poet laureate John Betjeman paid loving tribute to the one friend "who always made me laugh and never betrayed me." That life-long companion and bedmate was the distinguished Archibald (Archie) Ormsby Gore — the laureate's much-mended teddy bear.

Airport authorities regularly find evidence that the teddy-troth pledged in childhood is not lightly surrendered. The X-ray screen of ten reveals the plump silhouette with upright ears and outstretched arms, snugly stowed in the hand-luggage of jet-lagged businessmen. Even Margaret Thatcher is rumored to take her girlhood favorite aloft from time to time. Child psychiatrists have puzzled

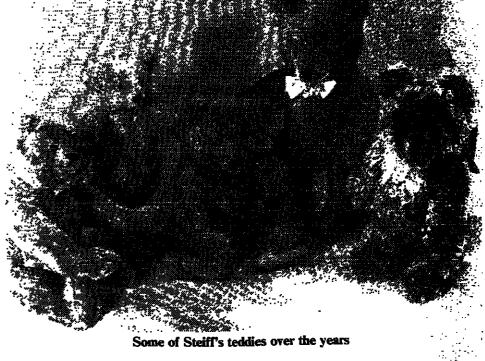

over the universal appeal of the cuddly bear. More than any other member of the playroom menager-ie, he is likely to offer confidence, consolation and lifelong companionship. The University of Munich the theme, and in the past year several German museums have mounted exhibitions exploring teddy's complex genealogy.

The most recent, at the Niederrheinisches museum of ethnic and cultural history here, focuses on the Teutonic branch of the family. Officially, teddy's birth certificate is dated 1903, but fans regularly de-bate his nationality. In keeping with his later ubiquitous life-style. the Christmas regular seems to have appeared simultaneously on both sides of the Atlantic.

The German ancestor, based on drawings made in 1902, had his premiere at the Leipzig trade fair the following spring.
His American cousin derived

from a cartoon in The Washington Post. It showed President Theodore Roosevelt sparing the life of a bear cub, and the Ideal Toy Company saw a unique opportunity to capitalize on the president's sporting image. With his permission, a new plush toy was marketed in 1903 under the name "Teddy Bear."

Ironically, it was an American buyer who, on the last day of the Leipzig fair in 1903, placed the sole pointed, the shoulders humped, designs, while yet another cultivat- venture to make the case so directly their legs floppy and their feet flat. ed overseas markets. Steiff animals as Flyte, who orders a silver brush

models were outlitted with a growl-

From the original order of 3,000 cubs for the American market, Steiff's annual production had grown by 1906 to 400,000 teddies; in 1907 it topped 1 million despite stiff competition from other Euro-pean producers.It was a success story that seemed to have more in common with the American dream than with a simple cottage industry in a German village.

The founder of the stuffed-toy dynasty was Margaret Steiff. Crippled by polio from childhood, she sought some ladylike handicraft to pass the time. In 1877 she opened a shop in Giengen, near Ulm, to sell objects made from felt, and soon enjoyed modest success with a pinenjoyed modest success with a pin-cushion shaped like an elephant. A £500 at auction. "A very nice donkey, a horse, a pig and a camel chap," scheduled to change hands soon joined the repertoire, but conceived now as toys rather than sew-

the finishing is done by hand.

For more than 80 years, through world wars and economic crises and shifts in toy fashions, teddy has remaind the firm's superstar. Replicas of the earliest models are once again on the market. Glass eyes have been replaced by plastic, and straw stuffing has yielded to synthetics, but the face of each bear is still individually fashioned. And it is the idiosyncratic expression bold or shy, naïve or naughty that establishes the personality.

According to Sotheby's toy-ex-pert Burny Campione, the value of a vintage teddy has little to do with size, condition or previous owner. "The decisive factor is always the individual character of the bear." Those with particulartly winning siderably more.
Collecting fever was unexpected-

ly fanned by the lavish British propeared as Sebastian Flyte, lovingly

# Attempted Rape Gets Lost in Attempted Thought

By Sheridan Morley

 ${f L}^{
m ONDON}$  — At the Duchess, a new play by William Mastrosimone called "Extremities" is, we are told, unsuitable for children; it's also unsuitable for anyone who expects an evening in the theater to contain more thought or drama than could be adequately contained with half an episode of "Starsky and Hutch."

Early in a drowsy evening Helen Mirren is discovered on stage incinerating a wasp, though whether to indicate a nasty nature or merely an

### THE LONDON STAGE

understandable determination not to get stung is unclear. A few moments later, visited unexpectedly by a neighborhood rapist making house calls, she sprays wasp-killer in his eyes presumably in an equally understandable determination not to get raped.

All of that happens in the play's opening 10 minutes. Afterwards there is not a lot. There is a blackout during which Mirren is somehow sup-posed to have got the burly rapist (Kevin McNally) into the fireplace and secured him there behind the bars of an iron bedstead that was presumably lying around. The rest of an endless two hours is largely occupied by a de-bate between Mirren and her two roommates (both female) as to what should be done with the rapist. Handing him over to the police is apparently not a good idea, as no actual rape has been committed and he will therefore get off with a warning. On the other hand he can't be left in the fireplace, not if they ever want to have a fire at any rate, nor does he seem much of an adornment to the room in terms of conversation

What we have here is intended to be a problem play, though it has been oddly disguised with the trappings of a thriller. The problem is, however, how to keep an audience in their seats through a two-act evening in which a man sits in

a fireplace being harangued by a woman he has failed to rape.

Off-Broadway, "Extremities" ran surprisingly well, largely because they dropped Farrah Fawcett into the leading role. Over here its chances, I would guess, are a lot shakier, though that is not the fault of Mirren, who works hard to give a turgid and lethargic evening some sort of dramatic credibility. Mastrosimone is, I think, trying to tell us that rape is not a terribly good idea, that the law is inclined to favor the rapist if there's any kind of doubt, and that dominant women drifting around in dressing gowns are more likely to get attacked than people who go off to the office every morning at . That at least is what Mirren's two roommates man in their fireplace.

Marty Cruickshank and Johanna Kirby stand gold as a rock snake. around a lot, as if hoping the dramatist might be about to give them a little help. He doesn't, however, he just leaves his rapist in the fireplace and Mirren looking cross I was hoping she might turn out to be his illegitimate daughter, or at the very least that the nights might turn cooler at the very least that the nights might turn cooler are that it recembles more of a school musish. and she absently-mindedly decided to light the cast that it resembles more of a school punishfire. No such luck, and no such play.

not surprised.

To a West End already invaded by telecomics (Rowan Atkinson as "The Nerd," Graeme Garden in "Little Hotel on the Side" and next month Rik Mayali as "The Government Inspector") comes Griff Rhys Jones in a new Dario Fo farce titled "Trumpets and Raspberries" (Phoenix). Though vastly less successful than "Accidental Death of an Anarchist," which ran for years in London but came to a surprisingly years in London but came to a surprisingly abrupt end on Broadway, this is another manic evening with a good deal going for it, not least Rhys Jones himself, who manages to play both a Fiat worker and his employer, the billionaire industrialist Agnelli, who seems to have become somewhat confused as a result of plastic surgery and a car crash. Rhys Jones also manages to be our commentator on the proceedings ("Think yourself lucky we're not doing it in the original Italian") to give them some sort of crude English context; it is, he tells us, as if Ian MacGregor has been rescued from the flames by Arthur Scargill and now no one can now tell them apart.

Fo wrote "Trumpets and Raspberries" in the wake of the Aldo Moro assassination, and it is clearly a Marxist response to that as well as the Fiat takeover by robots. Rhys Jones has however rightly decided that none of that is going to make much sense to a Phoenix audience. Roger McAvoy's translation has some good random jokes ("When I was II," says the head of the factory. "I was given a cowboy outlit and I've been running it ever since"). The rest of the cast led by Gwen Taylor know enough to stand aside while Rhys Jones gets on with the funny faces.

First of this year's Christmas "treats" is "The Jungle Book" at the Adelphi; not the old Disney musical but a dire dramatization of Kipling musical but a dire dramatization of Kipling ferry crossing. He arrived in London as the train written and directed by John Hartoch which reached Boulogne for the Channel crossing. He resembles an evening put together by the dearen resembles an evening put together by the drama group of a minor prep school at short notice and for parents only. In his determination to get ton-Williams, said the race against the Blue away from the Disney travesty (which at least you could whistle). Hartoch has assembled a up the price.

do, and when they return they are, understand- large number of actors prancing around bamboo poles in lectards while Fenella Fielding does a curious impersonation of Hermione Gin-

ment than a seasonal treat. Disney, for all his Mastrosimone tells us in a a program note commercial faults, at least made the "Jungle that he is now working for Brian DePalma. I am Book" memorable and entertaining: Hartoch makes the search for Mowgli look as tedious and aimless as I always thought it was. Actors are always at their worst when required to mime and hum: here they do a lot of both while pretending to writhe around the jungle watched over by a Gisborne who has wisely taken to the bottle. Anyone who thought that "Cats" had revolutionized standards of animal choreography on the London stage should take a long, hard and depressed look at this Jungle Book. Just don't take the family as well.

### **Bentley That Beat Train** In '31 Sold for £270,600

The Associated Press

LONDON — A vintage Bentley coupe that beat the Blue Train express from Monte Carlo to London in an epic 1931 race was sold at a special Sotheby's auction Monday to an American car collector for £270,600 pounds (about \$325,000). The buyer of the Bentley was not identified.

The green 1930 Bentley Speed Six is a sixcylinder roadster. It was the big prize in the auction of 20 veteran cars and horse-drawn carriages, held in the 250-year-old London headquarters of the Honorable Artillery Company, which fetched a total of £755,920 pounds (about \$907,000).

Joel (Barney) Barnato, a British racing driver who co-drove Bentleys to victory in the 1929 and 1930 Le Mans 24-hour races, beat the Blue Train to London for a bet of £100 with a friend; who took the train,

Barnato drove the 700 miles (1,126 kilometers) in 21 1-2 hours, including the Channel

### INSIGHTS

# Bhopal: A Chronology of Confusion, Contradictions and Questions

By Robert D. McFadden New York Times Service

EW YORK — It began without warning in the dead of night, while the vast and crowded slums of Bhopal, India, lay in slumber, dreaming the troubled dreams of want and hope, heedless of the danger in the wind scything over the silent metropolis.

The wind was brisk that night, As it rolled in from the northwest, out of India's central plains and across Bhopal, a city of 900,000 people 360 miles (580 kilometers) south of New Delhi, it picked up a cloud of toxic gas leaking from a storage tank at a Union Carbide plant.

In minutes, the gas, methyl isocyanate, began drifting through the nearest of the shantytowns. Within an hour, it had engulfed the dwellings of tens of thousands, and the terrible deaths and the living agonies of the worst industrial disaster in history had begun.

Hundreds died in their beds, most of them

children and old people weakened by hunger and frailty. Thousands more awoke to a nightmare of near suffocation, blindness and chaos.

By the thousands, they stumbled into the streets, choking, vomiting, sobbing burning tears, joining human stampedes fleeing the torment of mist that seemed to float everywhere. Some were run down by cars and trucks in the panic. Others fell, unable to go on, and died in the gutters along with water buffalo, dogs, goats

"We were choking and our eyes were burn-ing," said Ahmed Khan. "We could barely see the road through the fog and sirens and blaring. We didn't know which way to run."

ા જલાદુંથા

N the confusion, said Major Girish Tiwari, a local police superintendent, "mothers didn't know their children had died."

"The whole city became a big gas chamber," said Indira lyenger, an official of Mother Teresa's Missionaries of Charity. "These are poor, illiterate people. They don't understand what happened. Many are still asking me to explain what came in the night and blinded them and killed their families. They don't know what hit

Now, more than a week after the Dec. 3 tragedy, there are still unanswered questions: How did the leak occur? Who was responsible? Why did so many die? Could it have been prevented? Could it happen again elsewhere? Amid these uncertainties, even the number of casualties is unknown: the death toll exceeds 2,000 by official count; the estimates range up to 2,250 dead and 200,000 injured.

Confusion, contradictions, disputed facts, a refusal to divulge information - these bave characterized many of the official accounts from Bhopal and from Danbury, Connecticut, where Union Carbide Corp. has its headquar-

The company, concerned over lawsuits and liability, has refused to discuss many aspects of secretive, sealing off the plant even to its owners and placing some key company personnel under

What follows is a chronicle of the disaster, the circumstances that led up to it and an examination of questions that may be answered only after the completion of an Indian government investigation, which is expected to take several

HE account is based on reports from New York Times reporters in India and the United States, interviews with scientific and technical experts, statements by Indian officials and Union Carbide spokesmen, and the

stories of plant workers and victims.

The Union Carbide pesticide plant in Bhopal is a tangle of storage tanks, sheds, meandering pipes and nondescript buildings enclosed by fences of concrete block and barbed wire. The plant is set on 17 acres (6.8 hectares) on the northeast outskirts of Bhopal, the capital of Madhya Pradesh state.

Surrounding the complex on almost all sides are slums consisting of shacks fashioned of clay, thatch and scraps of wood and tin. Tens of thousands of people and countless domestic

The plant is owned by Union Carbide Corp., a diversified American manufacturer of chemical products, batteries, metal alloys and consumer goods. The company has factories in 30

The Bhopal plant is operated by an Indian subsidiary, Union Carbide India Ltd. The parent company owns 50.9 percent, and the subsidiary, run entirely by Indian citizens, operates 13

colorless extremely toxic and highly flammable chemical. The pesticides containing methyl isocyanate are known as carbamates, which, unlike the DDT compounds they replaced some years ago, degrade fairly rapidly, reducing the dangers to wildlife.

Union Carbide, which says it has manufaction Agency nor its Indian counterpart has rules

the Bhopal plant in the mid-1970s. Because of the extreme toxicity of methyl isocyanate and the dangers inherent in handling it and other pesticide chemicals, Union Carbide decided to employ a design that had been successfully used for decades at a similar plant in Institute, West Virginia. There, the company said, methyl isocyanate has been manufactured for 25 years

without serious incident. The safety standards and design and operating procedures used at Bhopal, the company said, were like those at the West Virginia facili-

Little has been disclosed about the design and layout of the Bhopal plant or the design and operation of the tank that leaked. Union Carbide has repeatedly refused to describe in detail or provide a schematic diagram of the system used to store, handle and process methyl isocya-

Indian government officials, who are in control of the site and of an investigation of the incident, have declined to let reporters into the plant and had even barred American officials of Union Carbide until Friday. They refused to iscuss the layout of the site or possible causes of what happened. Some things are known, however.

OR example, Jackson B. Browning, a lawyer and engineer who is Union Car-bide's director of health, safety and environmental affairs, said in Danbury last week that the tank was one of three 45-ton stainless steel cylinders that were buried in the ground at a shallow depth. He said two of the three tanks contained liquid, one was empty and only one leaked. It was unclear whether the 45 tons (40.8 metric tons) referred to the size or capacity of

The stored methyl isocyanate, he said, is refrigerated so that it remains liquid. Chemical experts last week explained that if the temperature of the liquid is permitted to rise beyond a critical point, or if the liquid is contaminated in certain ways, it turns into a gas. And as this gas expands, they said, it has to be allowed to escape in a controlled way to avoid a dangerous buildup of pressure.

Mr. Browning noted that the tank in Bhopal was designed to prevent toxic leaks by letting the gas escape through a system of vents and scrubbers that chemically altered it, rendering it harmless as it leaked into the open air.

The scrubbers, he said, used a caustic solution of sodium hydroxide to wash the gas and remove its toxicity.

Mr. Browning did not say how much methyl isocvanate was in the tanks at the time of the leak. S. Mitra, a plant official in Bhopal, said the vessel that leaked was a 15-ton tank, although like Mr. Browning, he did not specify whether he meant size or capacity. The minister of petro-leum and chemicals, V.P. Sathe, said there were three 15-ton tanks and that 15 tons of methyl isocyanate were in them. A later report by plant officials said 25 tons of liquid were in the tanks.

Mr. Browning did not say at what temperathe disaster. Indian officials, too, have been ture the chemical was supposed to have been maintained to keep it in a liquid state. An official of FMC Corp., another American company that makes methyl isocyanate, said its supplies were kept at 32 degrees Fahrenheit (zero Celsius) to retard vaporization and that its had been accidents inside. tanks were never more than 60 percent full.

The FMC spokesman said that if a tank heats and a gas forms, a diluting agent is used to cool incinerator. He said FMC had handled the

chemical for 15 years without a serious accident. At what temperature the liquid methyl isocy-anate turns to gas was unclear. Mr. Browning did not say. A Union Carbide official in Bhopal said it turned to gas at 70 degrees Fahrenheit; Mr. Sathe said the liquid turned to gas at about

THILE Mr. Browning said the Bhopal tank was completely underground, Mr.
Sathe said it was about two-thirds un-

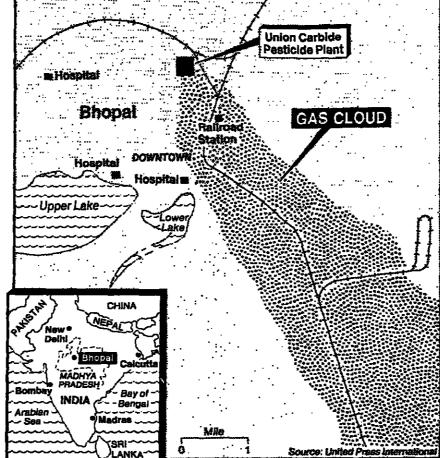

derground.
Elaborate safety precautions are warranted for anyone working around methyl isocyanate.

Exposure to the chemical, even small amounts, can produce extreme imitation to the eyes, skin and respiratory organs. Vomiting, racking coughs, a sense of suffocation and temporary blindness are common, according to American public health specialists.

In larger amounts, the specialists said, exposure can kill the cells of the cornea, the transparent covering of the eye, producing permanent blindness. It can also bring about emphysema asthma, bronchitis, pneumonia and other respiratory eithers to these said.

plants besides the one in Bhopal.

The Bhopal plant employs 650 people and produces 2,300 tons of pesticides annually. One of the ingredients it uses is methyl isocyanate, a colorless, extremely toxic and highly flammable.

There is no restriction in Indian law on build- were "unsure of the nature of this reaction, and ing chemical plants in urban areas, although on this hinges the investigation into the work-environmental officials in New Delhi proposed ings of the plant." last July a law that would bar hazardous-chemical plants within 15 miles of any city. Such a unnamed senior plant official, said that only law, even if applied retroactively, would plant.

bly not affect Union Carbide's Bhopal plant.

When the factory opened seven years ago, the when the factory opened seven years ago, the substance into the tank and "might have added some substance into the tank which set off the disaslaw, even if applied retroactively, would proba-

UT with the rapid industrialization of the area came thousands of new people, construction workers and migrants looking for jobs. Some helped build the plant. Many just drifted into the area, according to Mr. Browning.

During the construction and even long after there was anything left to do at the site, settlers continued to arrive, putting up hovels and shanties haphazardly, without electricity or water, on government land around the site. No serious effort was made to get them out,

Indian officials said. While Indian authorities and company officials apparently did not anticipate major problems beyond the boundaries of the plant, there

In 1981, one of three employees assigned to shut off a leak of phosgene gas, a component of methyl isocyanate that is also produced at Bho-pal, was killed when he failed to follow procedures and took off his gas mask in a contaminat-

ed area, the company said. Other reports have indicated that approximately 30 workers have been hurt in several accidents since then.

The disaster no one anticipated reportedly began sometime after midnight on Monday, Dec. 3. But the precise time is not known, and conflicting reports by company personnel, emergency crews, victims, news organizations and others put it as early as 2 P.M. Sunday and

as late as 1 A.M. Monday. About 100 to 120 employees, a fraction of the plant's work force, were on duty. Most of them were maintenance workers. The Hindustan Times reported that, despite a company policy requiring engineers to be on duty, none were

All evidence thus far suggests that it began as

a routine night shift.

But inside the steel tank that held thousands of gallons of liquid methyl isocyanate under what were supposed to be carefully controlled conditions, the temperature was rising danger ously. As it passed a critical point, the liquid began turning into a gas, and pressure began building in the tank,

HE cause of the abrupt rise in temperature and pressure is not yet known, but there are various theories. Among them are these: that a cleaning crew somehow con-So toxic is methyl isocyanate that occupational safety rules in the United States prohibit exposure in one eight-hour day to any more than 0.02 parts per million parts of air. Indian laws set similar limits.

But neither the U.S. Environmental Protections are the safety rules in the tank's contents, setting off a chemical reaction; that a refrigeration unit used to cool the chemical and keep it liquid failed, and that, because the liquid had not been tapped for a long time, pressure had been allowed to build slowly to a critical point. lowed to build slowly to a critical point.

"A chemical reaction took place in the tank

tured pesticides in India for many years, built to control the storage of such chemicals. Indian which held the gas, causing the substance to

bility that it failed.

TILL another theory for the rise in temperature and pressure was that the leaking lank had not been tapped since October and that so much pressure had been allowed to build that the gas had "overpassed" a safety

Like the cause of the buildup, the reason for the failure of the escape valve also was un-

As pressure built up in the main tank, the gas was supposed to have been diverted into a holding tank where scrubbers and solutions of caustic wash were to neutralize it before it was vented into the open air, according to K.S. tank was too hot. Kamdar, Union Carbide's vice president for

agrochemicals in Bhopal. The movement of the gas into the scrubbing tank apparently took place as it should, he said, but for reasons still unclear the neutralization

process did not work and the gas began venting. The neutralizing process requires a certain amount of residence time for the gas to be run through all the scrubber operations," said Mr. Kamdar, "That time just was not there. When gas gets under high pressure, it escapes at high

Y.P. Gokhale, the managing director of Union Carbide India, said the tank valve apparently had malfunctioned. Another report said the valve had broken under intense pressure, allowing the gas to escape before it could be processed by the scrubbers.

In any event, the gas was beginning to escape when an employee, making a routine gauge check, discovered that the temperature and pressure had passed "permissible limits," according to Mr. Sathe, the petroleum minister. He said an automatic alarm, which should have alerted workers to the danger, apparently did not go off.

Mr. Sathe said the employee, who has not been identified, may have tried to regulate the flow of gas, but failed and quickly notified a supervisor. At least two employees who should have helped take action to halt the leak fled from the scene, according to Major Tiwari, the police superintendent, who said these men were still being sought.

The supervisor who was notified of the leak, a man first identified only as "Shetti," was believed to be Shakeel Ahmed. He was among the few employees who tried to halt the runaway leak and was one of the few members of the plant's staff felled by the fumes, the authorities not on duty as they should have been and the

cleaners had no idea what to do and fled. Plant officials said later they could not confirm or R. Ahmed, who was placed under R. Anmed, who was passed guard at a hospital, where he was listed in critical condition, "is perhaps the One employee on duty that night, Sunil Kumar Dubey, a 32-year-old plant operator who only person who knows exactly what hapworks in the production of the pesticide Sevin, pened," a police official said.

dismissed the report that unskilled workers had The supervisor was apparently not the only employee who tried to control the gas.

"No nontechnical people are allowed near Mr. Dubey, the plant operator involved in production of Sevin, who was 50 feet (15 meters) Another theory of what happened, this one away when the leak occurred, recalled seeing tions for the unknown, who were covered with raised by Mr. Browning, was that the refrigeraothers as his eyes began to burn and tear. tion units that kept the chemical in a liquid state

"At about 1:10 A.M., we noticed this," he said from a bed at Hamidia Hospital in Bhopal. might have failed, allowing temperatures in the tank to rise abruptly and creating pressures too switch, which sounded the siren, warning people pyres that lighted the night sky of the stricken Because Indian officials sealed off the plant

plant officials. Union Carbide has been unable The time that the siren sounded was one of to investigate the cooling system and the possimany points at issue. Some residents of the nearby shims said they had heard no siren at all. Others said they heard the alarm only after 1:30

> Mr. Dubey said he did not know what the supervisor in charge of the tank had done during the crisis. But he said a number of workers had put on gas masks equipped with cylinders holding 20 to 30 minutes' air supply and had tried to

control the spread of the gas. Mr. Sathe said the gas was leaking so fast that there was no time to organize an effort to stop it before the tank emptied. The Press Trust of India, the government-supported news agency, quoting an unnamed employee, said the first efforts to cap the valve had failed because the

N attempt to control the gas outside the A tank failed, too, Mr. Dubey said he had seen some workers spray water, not at the tank but at the gas spreading out above it. apparently in an effort to disperse the cloud.
"But it was impossible," Mr. Dubey said. "By

this time more than 10 minutes had gone, and the gas covered the ground like a thick, white blanket, and we fled for our lives." The factory compound was quickly engulfed in the cloud of gas, a thick mist that reduced

visibility sharply, but many of the workers don-ned gas masks and fled. Only a few employees were hurt. There were conflicting reports on how long the gas leak continued and how much gas escaped. Union Carbide said that the gas leaked for 40 to 45 minutes, but Mr. Sathe said the tank

had been capped within 20 minutes by techni-cians wearing gas masks. "The leak was stopped in half an hour," said J. Mukund, the plant

Meantime, in the vicinity of the plant. Mr. Dubey recalled, the gas was "so thick that visibility became very difficult." As he ran on, stumbling, falling, picking himself up, he began to see frightening things through the mist.

"I saw children, women, old men dying and dead on the roads," he said. "It was horrible,

THE night wind swept out of the northwest and raced down upon the thickly populated slums, spreading the cloud of death everywhere.

The temperature was 57 degrees (14 degrees Celsius), and that, too, was a factor: The chill kept the whitish haze close to the ground, where it was most lethal, instead of letting it rise and evaporate, as it might have at higher tempera-

As dawn broke over Bhopal, the magnitude of the disaster became apparent. The bodies of people and animals littered the streets; trucks were sent out to pick them up. A house-to-house search of the slums turned up hundreds of additional victims.

Many of the bodies were unidentified; nevertheless, they had to be disposed of quickly to avoid the danger of an epidemic. Through the day, there were mass burials and mass cremared and white sheets, each bearing a printed

As dusk fell over the cremation grounds, 70 "Others immediately triggered the emergency fires could be counted, row after row of burning

### INTERNATIONAL MANAGER

# How to Deal With the Media: To Widen **Executives Return to School**

By SHERRY BUCHANAN

International Herald Tribune ARIS — Mike Wallace, the U.S. television journalist whose questions can make chief executives cower, doesn't travel to Europe much. But for European businessmen, there are European interviewers, and Mike Wallace's absence doesn't mean that those businessmen won't face difficult questions on radio or television.

In fact, European executives are finding out that business schools are not acting schools, and that appearances on television without preparation can be disastrous.

out that TV without

preparation can

be disastrous.

French executives in particular, used to operating in a society that sometimes frowns on profit and success, have pre-ferred to keep as low a profile Europeans are finding

as possible. But all that is changing.
"You can't live hidden in order to live happy anymore. It's become a necessity for ex-

controls to come out into the open," says Pierre Homsy, president of the Homsy Delafosse & Associes group, a major French advertising agency. Decider's, a subsidiary of the group, consults on corporate image strategy.

A number of people in Paris are making a living from coaching

senior executives on how to handle television interviews, other media events and tough board meetings. Some are former newscasters, others have advertising agencies or public-relations companies and offer executive television

training as an additional service to their clients. Among these are such companies as Hill & Knowlton, a U.S. public relations group.

Prices in Paris are comparable to those in New York, where coaching services for camera-shy executives average \$1,000 a day.

Bernard Krief Consultants, a group that also recruits execu-

tives, charges 10,000 francs (about \$1,100) for a one-day seminar, 50,000 francs for a weekly seminar and 50,000 francs for an individual tailor-made session. HERE are, however, some relative bargains, such as at KCV, a company headed by Jean-Marie Cavada, a television journalist and news executive who once headed the

news division of TF1, one of France's three state-owned television networks. KCV charges less than \$100 an hour for six two-hour sessions with journalists. But for many French senior executives, going to a television image-building session is like going to an Alcoholics Anonymous meeting. It's not the kind of thing you brag about to your

The reason, most industry analysis say, is that the French rarely are as forthcoming as many of their American counterparts are about their ambitions, and to gossip about one's course on

handling tough television interviews might seem like self-promo-Those who have a stake in the business, however, insist that

attitudes are changing and that the market is growing downward, from chief executives to senior and middle managers. Approaches to training are as various as there are people in the

Most trainers include practical tips to help the executive come across better on television. Le look, for instance, is important. Most coaches say there is no one look to seek, but several to be

"You don't want to look like an undertaker, for instance; a lot of these executives have a sad and drab appearance," says Jérôme Walrafen of KCV.

Other suggestions deal with posture and basic speech: Don't look down at your shoes, stick to short sentences, don't use erudite quotations (a common fault among French executives) and don't use technical jargon.

Most courses also take executives through simulation exercises, where journalists ask them tough practice questions about their company's activities. During these sessions, the executives are taught two things: First, try to give journalists what they might perceive as a good story, while remaining calm.

"The better the executives are, the better the interview," says

# Citibank U.K. Role

### U.S. Bank to Join Clearing System

LONDON - Citibank said

Tuesday that it was set to become the first overseas bank to receive payment settlement privileges in the British Clearing House system.

Citibank, held by Citicorp of New York, and the Bankers Clear-ing House of London said that, subject to formalities, Ciubank will join a new clearing company that will provide same-day settlement for payments of more than £10,000

The new company also will include Town Clearing System, a current same-day check-clearing system, and the Clearing House Automated Payments System (CHAPS), a computerized sameday clearing system that went into operation in February. Both clearing houses are in London.

Citibank also will become a member of the new London-based Association for Payment Clearing Services, an umbrella body that will oversee the development of the check-clearing system.

Standard Chartered Bank PLC of Britain also was set to join CHAPS and Town Clearing fol-lowing a nine-month review of the payments system by the 10 dominant clearing banks.

Three companies will be under the new umbrella body, each with separate shareholdings to cover pa-per bulk clearing, high value clear-ing and bulk electronic clearing.

A Bankers Clearing House report said that as many as 25 banks could join the main clearing system and another 200 banks and 200 building societies could become associate members.

The clearing system handled 3.34 billion payment items in 1983, 80 percent of all non-cash deals in England and Wales.

Nicholas Deak, in 1982, outside a New York office of his foreign-exchange company.

# Money-Laundering Charges Drove Deak & Co., 2 Units to Chapter 11

By Nicholas D. Kristof New York Times Service

NEW YORK - In the world of foreign exchange and precious metals, no name glitters like

Founded in 1939 by a Hungarian immigrant, Nicholas L. Deak, the company grew into prominence by making markets in currencies no one else would touch and, in later years, by aggressively promoting private investment in gold.

Today, it is the largest nonbank foreign exchange and precious metals operation in the United States.

Two much less prominent subsidiaries of Deak & Co., however, helped blacken the family's name and sour its fortunes. The two units, operating somewhat like banks, drew allegations from a federal commission on organized crime that they had been used to launder tens of millions of dollars in drug money.

It was these units and these allegations that

drove parts of the Deak empire into bankruptcy court last Thursday, the company acknowledged. The Deaks have denied the allegations.

The units that sought court protection from creditors under Chapter 11 of the federal Bank-ruptcy Code are the holding company, Deak & Co., and two subsidiaries, Deak-Perera Wall Street, and Deak-Perera International Banking

Deak-Perera U.S. Inc., the family's best-known holding did not file under Chapter 11.

At the heart of the collapse, according to the Deak family, are allegations in a report by the President's Commission on Organized Crime about the laundering of money so drug traffickers

could secretly repatriate profits to Latin America.

"The damage we have suffered from maliciousness in that report to a very great extent caused the downfall of a very fine firm and the damage to a very fine man, my dad," said Nicholas Deak's son, R. Leslie Deak, executive vice president of Deak & Co. and president of Deak-Perera U.S.

In an interview last week in the company's deserted offices in New York City, the younger Mr. Deak said that rivals circulated the commission's report among depositors, who withdrew their money and created a liquidity crunch. He would not identify who those rivals were. .

Nicholas Deak, chairman of the company, did not return telephone calls to his office. Officials in other companies in the business either said they were unfamiliar with the empire's problems or declined to comment. But the Deak problem is not just a liquidity

crisis brought on by anxious depositors. Documents in bankruptcy court show the holding company's assets at \$62.2 million and liabilities at \$95 million. Deposits, which bore high interest rates, were invested in the precious metals and

# Yamani Warns **Against Cuts in** North Sea Prices

MANAMA, Bahrain - Any new price cuts by North Sea oil producers could lead to an oil price war, the Saudi Arabian oil minister, Sheikh Ahmed Zaki Yamani, warned Tuesday.

In a statement issued by the official Saudi news agency, monitored in Bahrain, Sheikh Yamani said: "While the kingdom does not like any sort of price war, if it is forced into one, it will surely succeed. In fact, our losses in such a situation will be limited compared to those on the other side.

"Any adjustment of pricing by North Sea producers will open the door for a price war, Sheikh Yama-"It will also cost other oil pro-

ducers a tremendous loss," he said. Saudi Arabia only hopes wisdom will prevail in place of a hasty decision whose consequence only God

Sheikh Yamani was responding to increasing pressures on the Brit-ish and Norwegian state marketing organizations to cut their rates, since spot-market prices have run below official levels for most of this

Those pressures have led Statoil, the Norwegian state oil company, to agree to offer its output for December at a "market-related" price. A Statoil spokesman, Haakon Lavik, announced Statoil's decision Tuesday in Stavanger, a base

of operations for Norway's North Sea production. He said that Statoil's contract rate of \$30 a barrel has been "suspended," although not formally modified, because "it doesn't relect the evolution of the market." Mr. Lavik said that new prices

will be set later this month or early

In London, meanwhile, the British energy minister, Alick Buchan-an-Smith, dismissed reports that marketing policy based on monthly rather than quarterly price fixings.

Sheikh Ahmed Zaki Yamani

His statement contrasted, however, with one made last Thursday by Ian Goskirk, a BNOC executive. before the same panel, Mr. Goskirk had said that BNOC would soon modify its price formula to take into account lower prices on the spot market.

In his statement Tuesday, Mr. Buchanan-Smith also said that he had no idea when a decision on BNOC's first-quarter prices would

In his statement Tuesday, Sheikh Yamani said he was not concerned about an immediate price war, because "the level of production and the amount of oil stored by consumers will help prop up prices."
On Monday, Sheikh Yamani

said in Riyadh that he was confident that the Organization of Petroleum Exporting Countries, whose oil ministers meet in Dec. 19 in Geneva, could defend its benchmark price of \$29 a barrel.

At an emergency meeting in October, the ministers cut OPEC's production ceiling by 1.5 million British National Oil Corp. was barrels per day, to 16 million barmoving toward a more flexible oil rels per day, to prop up the price after Norwegian and British cuts. (Reuters, AFP, UPI)

# Is Expected To Continue

NEW YORK - Two executives of American Telephone & Telegraph Co. said Tuesday that the recently divested company's 1984 earnings would just cover its divi-

dend payout.

The forecast was initially made at a meeting in London by James E. Olson, chairman of AT&T Tech-Olson, chairman of AT&T Technologies, an AT&T operating Robert White, head of the Canadigroup. He did not elaborate.

The AT&T chairman, Charles L. Brown, told a group of securities analysts in New York later Tuesday that he agreed with Mr. Olson's

\*Our business is more risky than it has been in the past and our dividend policy is going to reflect that," Mr. Brown said, adding that expected the company to perform better in 1985.

AT&T paid a regular quarterly dividend of 30 cents per share on

Nov. 1, Speaking at a Financial Times conference on world telecommunications, Mr. Olson said that the Jan. 1 breakup of the New York-based AT&T into independent regional telephone companies has worked well.

From the standpoint of investors, the parts are worth more today than the whole was at the time of divesture," Mr. Olson said. "The composite stock price of the eight companies — AT&T and the seven regional companies -- has increased about 16 percent. And the dividend has held.

As a result of the divestiture, Mr. Olson said, "We are now more like an emerging growth company, or even a start-up concern, than a mature supplier of communications products and services." Consequently, a number of changes have

become necessary, he said.

First, is the need for a better understanding of our customers and our competitors, by market segment," he said. "Second is the need to get our costs down. Another reality of the new environment is the need to get products to market

He added that a key objective is to extend technological capabilities outside the United States. AT&T Technologies is one of two major operating groups under

the new AT&T.

The AT&T Technologies group consists largely of AT&T's old Western Electric operation and includes AT&T international, the parent company's international marketing arm.

# Economists Find Tax Plan May Retard U.S. Growth

By Peter T. Kilborn New York Times Service

WASHINGTON -- Many of the nation's leading economists have found that the Treasury Department's new tax plan would be more likely to retard the nation's economic growth than to accelerate it, at least during the rest of the 1980s. This is contrary to the Treasury Department's expectations that the

plan would foster growth. When he announced his plan two weeks ago. Treasury Secretary Donald T. Regan said of the pre-sent tax code, "It's unfair and it retards saving and investment and economic growth. It must be

> at Data Resources Inc., concluded Monday after scrutinizing the the budget. We've had them on this Treasury plan for two weeks that tax simplification. So we're behind growth would be "marginally" the curve on doing this, but we'll slower if the plan were adopted, catch up sooner or later."

Memene Bank Nede Banque Vationale de Margin-Buying Balance Rises in Japan Markets

Remers

TOKYO — The outstanding balance of margin-buying positions on the Tokyo, Osaka and Nagoya stock exchanges rose 44.2 billion yen (\$178 million) last week to a record 2.83 trillion yen at the end of the week, the Tokyo Stock Exchange said Tuesday.

It was the second consecutive week-on-week increase, the exchange said. Selling positions on the three exchanges rose 13.6 billion yen to 30.3 billion yen, the second straight weekly rise, it added.

# Mitsubishi Corp. Net Rose By 15% in the Fiscal Half

TOKYO - Missubishi Corp., Japan's largest trading house, reported Tuesday that group earn-ings for the fiscal first half rose 15 cause of increased oil and energy percent on a 9.4-percent sales in-

Mitsubishi reported net income of 16.85 billion yen (\$68.2 million), or 12.01 yen a share, in the balf ended Sept. 30, up from 14.67 bil-lion yen, or 10.46 yen a share, a year earlier. Sales were 8.302 trillion yen, up from 7.588 trillion yen.

The higher earnings were helped by reductions in the deficits of subsidiaries and increased profitability, although marketing and management expenses increased, the company said.

Of total sales, exports fell 0.7 percent from a year earlier to 1.315 trillion yen because of a decline in industrial plant sales to developing countries, but imports rose 7.9 percent to 2.712 trillion yen on in-

Bastogi May Sell

### Investor Weighs Datapoint Bid

The Associated Press NEW YORK - Asher B. Edelman, a New York investor who has interests in Mohawk Data Sciences Corp., says he is considering a bid to take control of Datapoint Corp., anoth-

er computer maker. Mr. Edelman, in an interview Monday, said he now controls 8 percent of Datapoint's stock, and that he is considering acquiring more. Mr. Edelman has moved to buy into computer groups in the past. Most recently, he bought a large stake in Mohawk, which recorded heavy

losses in its last fiscal year. In a filing with the Securities and Exchange Commission, Mr. Edelman said he held 1.6 million Datapoint common shares, acquired at between \$14.375 and \$18.125 a share, Datapoint closed Tuesday at \$18 a share, down 624 cents.

### China Said to Set Airbus Purchases

Agence France-Presse
BEIJING — Deputy Prime Minister Li Peng has announced the decision in principle of China to buy three Airbus A-310 aircraft from the European Airbus Industrie consortium, according to a Western diplomatic source.

Details of the contract, which has not yet been signed, are to be discussed later, the source indicated, adding that some aircraft also could be leased by China. Mr. Li made the announcement Monday during a meeting with a delegation of participants at an international air fair that opened here Sunday.

General Jacques Mitterrand, who heads an organization of French aerospace manufacturers and who is the brother of President François Mitterrand of France, said at the fair here that Airbus Industrie and the Chinese authorities also are discussing the possibility of having certain parts for another Airbus, the A-320, produced

**Electronics Unit** MILAN — Bastogi SpA is nego-tiating the sale of its electronics subsidiary. Siel, to International Signal & Control Group PLC, which is a British-based holding company for a number of U.S. electronics companies, the financial daily Il Sole 24 Ore reported Tues-

The newspaper said Bastogi was hoping to conclude negotiations for the sale by the end of the year. It did not estimate a figure for an agreement. A Bastogi spokesman declined comment. Bastogi closed here Tuesday at 135 lire (7 cents), off from 140.50 lire Monday but up from 120 lire at the beginning of

Siel had net profits of 3 billion lire (\$1.57 million) in 1983, on sales of 131.6 billion lire. The Bastogi spokesman said that sales are expected to increase to 150 billion lire in 1984, and that profits will also

Gulf & Western Inc., New York City, said it had received about 9.5 million shares, or more than 95 percent, of Prentice-Hall Inc.'s common stock under its \$71-a-share tender offer for all shares outsatanding that expired Dec. 10. Gulf & Western said it would acquire the remaining shares of the Englewood Cliffs, New Jersey, publisher at the same price.

Mellon Bank Corp. said that it would invest \$28 million in Heritage Bancorp, while awaiting laws that would allow interstate banking. Mellon, based in Pittsburgh, Pennsylvania, is barred by federal law from immediately acquiring the holding company based in Jamesburg, New Jersey, but has said it expects the proposed merger to be approved by the end of the decade either by the U.S. Congress or the two states' legislatures.

Pharmacia AB said it expected to

company uses to make an eye sur-

gery aid. Siemens AG said it and its 75percent-owned subsidiary, Transformatoren Union AG, had received an order valued at about 150 would produce 3.49 million vehimillion Deutsche marks (\$48.54 cles in 1985, a 2-percent increase million) for a high-voltage switch from the estimated 3.42 million plant in Mecca, Saudi Arabia. The West German electronics company the Japanese automaker said exsaid the order also covered expansion of the electricity network in Mecca and Jeddah.

Société Nationale Elf Aquitaine said consolidated revenue in- to 1.67 million. creased to 130 billion francs (\$13.72 billion) in the first nine planned to boost the share capital months of 1984, up from 90 billion of its banking subsidiary, V.A.G. francs a year earlier. lberia flies between Madrid and 27 North, Central and South American cities: Montreal, Toronto, Boston, New York, Miami, Chicago", Los Angeles", Dallas", San Juan, Havana, Mexico City, Guatemala, Managua, San Jose, Panama, Santo Domingo, Caracas, Bogota, Quito, Guayaquil, Lima, Rio de Janeiro, Sao Paulo, Asuncion, Santago, Montevideo and Buenos Aires.

Theria also flies from Las Palmas to Buenos Aires and New York. And from Barcelona our special "Cataluña" Intercontinental service makes quick and easy connections with New York, Miami, Montreal, Mexico City, Caracas. Havana, Buenos Aires, Santiago, San Juan, San Juse, Lima, Bogota, Quito, Guayaquil, Rio de Janeiro, Montevideo, Asuncion, Sao Paulo, Santo Domingo, Panama, Guatemala, Managua, And also with Nairobi, Johannesburg, Lagos and Abidjan in Africa.

On your way to or from Santiago de Compostela, in the Northwest of Spain, our special "Galicia Intercontinental"

Scheduled Charter Services.

service makes smooth connections with New York, Caraças, Montreal and Mexico.

All on comfortable 747 and DC-10 wide bodies. Always with three classes to choose from: Grand Class. Preference or Economy. With an average of 33-flights

every week.

That's why Iberia is the best way to cross the Atlantic, both ways, between 27 North Central and South American cities and Spanish, European, African or Middle Eastern cities.

Because theria is the only airline in the world that links so many cities on the new continent with so many on the old. From the North to the South, Iberia's Highway bridges the Atlantic.

Iberia: Spain's Highway to the world.

# Amax Names Papson Head Of New Unit

By Brenda Hagerty
International Herald Tribune
LONDON — Amax Inc., the diversified U.S. minerals and energy
concern, has set up a countertrade
unit called Amax Countertrade
ventures Inc. It will assist thirdparty exporters with blocked funds,
harter, counterpurchase and other barter, counterpurchase and other international trade obligations involving minerals and metal prod-

Based in Greenwich, Connectiwas named vice president, counter-trade. He joined Amax from Xerox Corp., where he most recently was director of planning for its Mexi-can affiliate, based in Mexico City.

again. Merrill's Capital Markets division has named Alan Lechner, a lormer research chief for Lehman Hong Kong office. Paul B. Finn is Brothers Kuhn Loeb Inc. in New York has named Thomas B. Ketchum general tranager of its Hong Kong office. Paul B. Finn is to succeed Mr. Ketchum as head of the Hong Kong office's banking department. Mr. Finn currently is with Banco Inter-Atlantico de Investimento SA, a Morgan joint venture in Brazil. Mr. Ketchum succeed in Brazil. Mr. Ketchum general tranager of its former research chief for Lehman Hong Kong office. Paul B. Finn is to succeed Mr. Ketchum as head of the Hong Kong office.

cnt, Amax Countertrade Ventures is headed by Frank J. Papson, who was named vice president, countertrade. He joined Amax from Xerox Corp., where he most recently was director of planning for its Mexical Mexical Residence of Sancta School Residence of Sancta School Residence of Banque Europeanne pour l'Amerique Latine SA in Brussels. Previously, Mr. Blomjous was in the bank's office in Eindhoven.

Lechner is charged with recruiting about 10 analysis to cover the major industries of Europe.

Merrill already has put together a new research team in Asia. The European drive follows a false start in 1983, when Merrill made headlines in London by mentioning fat salaries to top-rated analysis but then held off in making firm offers until a research director could be found.

Amsterdam-Rotterdam Bank NV has named Johannes Blomjous general manager of its Dubai branch. He succeeds Johan Bontekoe, who has been nominated as a

Nestle SA said Reto Domeni-coni has been appointed a general manager. He will be in charge of the Swiss food conglomerate's fi-nance, control and administration, filling a vacancy. Mr. Domeniconi joined Nestlé in 1983.

Barclays Bank PLC said James Prior, chairman of General Electric Co. of Britain, is to become a director Jan. 1. He will also join the boards of Barclays PLC and of

Barclays International Ltd.
Chemical Bank of New York and
Sanwa Bank of Tokyo have formed
a joint venture merchant bank in
Singapore called Chemical Sanwa
Merchant Bank Ltd. Named managing directors of the new venture were Daniel J. Kreps of Chemical Bank and Fumio Kaneko of Sanwa

IE APPLE ESCORT SERVICE NYC 212-243-0893

finally emerged as not so much infamous as inadequate; "after filtering off the rhespite and

the lies in good or bad faith there remained a typically gray human specimen." The whole episode rings profoundly, miscrably true.

The book concludes with the history of an

atom of carbon — a fable about the infiniture of matter with which we somehow have to

reconcile our sense of human uniqueness. And

then at the very end of the last line of his last paragraph Levi poses the problem of mind in

relation to matter with a witty fancy which it

would be unfair to give away in a review, but

which rounds off a memorable book with a

to a trump, he was able to draw trumps and play clubs, ruffing out West's king. This gave him four club tricks and permitted him to discard dummy's spade and diamond losers.

occasion. If he paused to consider what sort of hand South must have, or had even asked himself why South had made a quite unusual ducking play, he could have found the vital counter-move. The lead of the spade queen at the second trick would have forced out South's crucial entry and defeated the slam.

THE PERIODIC TABLE

Schocken, 200 Madison Ave.,

Reviewed by John Gross

New York, N. Y. 10016.

By Primo Levi. Translated from the Italian by Raymond Rosenthal. 233 pp. \$16.95.

THE Italian anthor Primo Levi is a chemist

1 by profession, and in writing this remark-

able memoir he has had recourse to one of the

most basic tools of his trade - the periodic

table, in which the chemical elements are ar-

ranged according to their atomic numbers.

Instead of writing a conventional autobiogra-

phy he casts his eye over the table, picking out

now one element and now another - about 20

in all - and following up the memories or

preoccupations they bring to mind. Chromium evokes a whole phase of his past, silver and tin

recall particular incidents, zinc and potassium

come to embody hard-earned lessons about

and subtle insight into character. It is respect

for a fellow artist rather than sympathy with a

former victim that has won him high praise

from such contemporaries as Umberto Eco

In "The Periodic Table" he writes no less

incisively than in his earlier books, and with

greater imaginative range. His approach matches the subject matter in its variety; each

episode, like each element, has its distinctive

Why does he entitle the opening section

"Argon," for instance? Because argon is one of the so-called inert or rare gases, and these gases

remind him of his ancestors, who had to work

hard enough to earn their bread, but who were

"inert in their inner spirits, inclined to disinter-ested speculation, witty discourses, elegant, sophisticated, and gratuitous discussion."

They were also marginals among marginals,

members of the Jewish community that arrived

in Piedmont from Spain by way of Provence

around 1500, bringing ancient traditions with

them and developing new ones — including a patois (the local Piedmontese dialect inlaid

with Hebrew) of which Levi gives many fasci-

the "Nitrogen" section. Levi, trying to get what work he can in the years just after the war (we are in the epoch of movies like "The Bicycle

Thief") is hired as a consultant by a shifty

businessman who wants to find out why the

cheap lipstick he manufactures won't stay in

place. It turns out that the missing ingredient

can most readily be extracted either from

chicken droppings or snake droppings, a dis-covery that gives Levi philosophical satisfac-tion — after all, "that is what nature does: it

draws the fern's grace from the putrefaction of the forest floor." But further investigation in

the countryside and at the 200 reveals that the

waste products in question are much harder to procure than you might suppose, and far more

One chapter in particular stands out. In the 1960s Levi found himself in correspondence

with his opposite number in a German compa-

ny about a shipment of vanadium, used in

making varnish; gradually he realized that by an eerie coincidence the Dr. Muller he was

writing to was the same Muller who had been

in charge of the laboratory where he was a

All this is a far cry from the low comedy of

and Italo Calvino.

By Alan Truscott

expensive.

O savor the interesting and difficult problem faced by West on the dia-gramed deal, the reader should cover the East and South hands and plan the defense. The contract is six hearts reached after a transfer auction in which South has shown two aces. The spade king is led

and wins the first trick.

South made a fine play by allowing the spade king to win the first trick: he saw that he needed the ace as an eventual entry to his hand for clubs. When West shifted routinely

that kisses between even consenting players are unmanly, that performers whose exuberance is likely to incite even celebratory encroachment onto the field by fans should be punished by suspension. But the minor invasion following

Saturday's 2-0 eclipse of East Germany was different. It was the act of passion of Fernand Sastre, who happens to be not only the presi-dential figurehead of French soccer during its finest year but also an honored member of FIFA's board of appeal for the 1986 World Cup.

So you wouldn't expect the powers that be to bring to book one of their own, a gentleman who was merely expressing himself as, I read, the French have done for centuries. Certainly not.

It is, anyway, pure jealousy that makes an Englishman look at the French that way. We do not have such a leader as Sastre, able to preside with such flamboyant devotion over a team that has Platini and Giresse and Tigana and Bossis.

There are not many anywhere so attractive, so deserving of fond em-brace as Platini. He, the captain, leads a team now as dependable as it is artistic.

Sure, 11 of the 12 victories have come on French soil. Sure, les Bleus must in 1985 demonstrate the same resolve on such testing journeys as Yugoslavia and Bulgaria. But in 1984 the team achieved all that could have been asked of it. Platini, and for this observer particularly the ebullient little Alam Giresse, restored the values of soccer as a game beyond a business.

The time is nigh for a friend of this column, a Parisian heart doctor, to raise his glass and reconsider his assertion that British soccer like whiskey to French wine -had a solid dependability that his own, for all its sparkle, lacked. Time, too, for the game to take

itself a little less seriously, to kiss Brazil, for example. The one na- Giresse, left, and Platini: Dependable artists preparing for the match against East Germany.

alism broke the barriers.

It was Santana who liberated Les Bleus, champions of Europe samba soccer in 1982 and Santana at Parc des Princes to embrace Mi-chel Platini cheek-to-cheek in the Two managers had since at-

tempted to drag Brazil toward a And perhaps a flush of embar-rassment imged the cheeks of on-looking FIFA and UEFA officials.

more pragmatic approach. They failed. The man of fluir is back, and presumably once some leading Brastimulants that have recently been detected in their systems we will all get a kick out of authentic Latin American soccer again.

We can also hope, as West German manager Franz Beckenbauer may hope, that he and Bernd Schuster, the eternal enfant terrible, can learn to love one another. West Germany plays a World Cup qualifying game in Malta on Sunday while Schuster, still estranged from Beckenbauer's squad, captains a Barcelona side he has led to the top of the Spanish League.
Fit for the first time in years, the

blond midfielder is drawing rave notices not only for skills that at

Although Schuster's last words regarding Beckenbauer amount to 'England's FA, no fonder of in-childish insults, he might recall be-subordination than of exchanged ing equally derogatory about Bar-celona's new coaching messiah, En-misled, avaricious Wright with

glishman Terry Venables, until bringing the game into disrepute.

Venables's humor and profession—

## **OBSERVER** Leadening the Language

By Russell Baker NEW YORK — Not surpris-ingly, the television-besorted Reagan administration has a very thin performance record when it comes to enriching the English lan-

guage.
"The window of vulnerability" a polysyllabic synonym for missile gap" — has never caught on outside Washington. Probably it sounded too much like Pentagon talk, which goes down like milk and molasses in Washington but sounds elsewhere like the noise of Brazil nuts being put through a meat grinder.

The original "missile gap." by comparison, has such a fetching tone that the country at large hated to give it up even after the Kennedy administration --- whose 1960 campaign created it - declared it "inoperative" in 1961.

I place quotation marks around "inoperative" somewhat misleadingly, for it was not the Kennedy people who invented that comical euphemism for, "We lied about that, so just forget it." It was the Nixon administration 10 years lat-

er.
The Kennedy administration, not having "inoperative" available, simply said that after reviewing the situation it had changed its opinion about President Eisenhower's having created an alarming military weakness, and there wasn't any "missile gap" after all.

Americans had fallen in love with the "gap," however, and hated to give it up, with the result that scarcely a year has passed since 1961 without the unearthing of a disturbing new "gap." Just recently we have had a "gender gap." Its existence was said to make the vicepresidential nomination of Geraldine Ferraro a stroke of inspired

political cunning.
In the wake of last month's election results, will the "gender gap" prove to be as "inoperative" as the "missile gap" of 1960? Or will the "gender gap" continue to "stand tall" in spite of this setback?

"Standing tall" is one of the few Reagan additions to the language that isn't leaden. ("What does America do as long as Reagan's in charge?" "Stands tall.") It's not bad. There is just enough Hollywood sagebrush in the sound of it to make people think of cowboys

to the

INTERNATIONAL

who shower and change underwear every day, just like millions of in-ternal-combustion-engine-boys hunched over their steering wheels in rush-hour traffic.

It's flattering to think of yourself "standing tall" when you're hunching tense. It is certainly more satisfying than thinking of yourself as "staying the course." "Staying the course" was the policy President Reagan urged upon the nation in the 1982 elections, and of course the president's party took a whipping at the polls that year.

No wonder. "Staying the course" is an activity of ancient civilizations. "Over the ages," people say, "the Jewish people have stayed the course." And: "Maybe the Chinese people don't have as much fun as Californians do, but for thousands of years they have stayed the

'Staying the course" is commendable, but it is not American. American is breaking up the marriage whenever you can't agree what television shows to watch. American is abandoning the course when it gives you a headache.

The Reagan government's talent, of course, is for pictures, but brilliant as it is in exploiting visual imagery's power to overwhelm reason, it is inept at inventing vocabulary that can do the same.

Thus it coined the transparently fraudulent "revenue enhancement to mean "tax boosts." That one having been laughed away, it is now trying "tax simplification" on

'Window of vulnerability,' "revenue enhancement" and "tax simplification" have the same mind-numbing impact. One notable effort to break from Pentagonese produced "Peacekeeper," a word meaning "MX missile packed with thermonuclear rubblemaker. When it comes to language, we expect most politicians to have tin ears but to sense when they are beginning to sound foolish.

The president himself though, when they unleash him to speak, shows some talent for colorful expression. His mythical town of South Succotash" may go down as his government's only enduring contribution to the language.

# Whale Getting Rare in Japanese Diet

Once a Cheap Meat for the Masses, 'Kujira' Is Becoming a Disappearing Delicacy

By Christine Chapman International Herald Tribune

TOKYO — Customers at the Kujiraya

Teat two or three whales a year, boiled, broiled, fried, barbecued, and raw.

Whale, once an ordinary, rather cheap meat, is being elevated to a delicacy by its scarcity. Tokyo supermarkets and fish shops rarely carry whale on their shelves these days, and cookbooks no longer include recipes for whale. The unpretentious Kujiraya is now the only Tokyo restaurant which devotes its menu solely to whale

Kujira means whale and ya means shop or restaurant and, at the moment, whale means another difficult international problem for the Japanese as the United States is restricting their catch and, they say, dictat-ing and possibly destroying a centuries-old culinary habit.

Because of the international conservationist movement to save the whales, whale dishes, which are still being prepared at Kujiraya, may no longer be available in a few more years.

The International Whaling Commission (TWC) voted to stop the hunting of sperm whales this year with a moratorium on all commercial whale hunting to begin in 1986. The Japanese originally exempted themselves from the sperm whale decison but Tuesday the Japanese government decided go withdraw its objection. In urging Japan to remove the objection and make the IWC effective, the United States had threatened to reduce regular Japanese fishing in American waters by 50 percent.

"Unfair and unconscionable," insisted Shigeru Hasui, chairman of the Japan Whaling Association during a press conference at the Foreign Correspondents Club on Thanksgiving Day. "We are not greedy slaughterers of whales. The Japanese di-etary culture, which includes eating whale meat, dates back more than 1,000 years. No nation should intrude on long-established food preferences."

Japan's "whale culture," as the Japanese describe it, may have begun along the coast from Hokkaido in the north to Kyushu in the south as early as the 7th century when Buddism forbade the eating of four-legged animals. Then the whale, a Cetacean mammal, was considered a fish and an important source of food. Throughout Japan's history until recently, whale was a plebeian meat, filling, inexpensive, and full of pro-tein. After World War II, when all foods were in short supply, whale-hunting re-sumed in earnest to help feed the hungry

"In my childhood when I lived near the

ocean in Mie Prefecture, my mother used ers to accompany the main course: tsukuto make a pot of whale stew for my four brothers and me," said 43-year-old Sakae Kato, a Tokyo businessman. "But I haven't had whale meat for the past seven or eight

With the gradual addition of pork, chicken and beef to the diet of the Japanese, their menus became at least as varied and as interesting as those of the West. Today the Japanese do not rely on whale as a regular food. But to deny them whale, they insist, is like banning turkey from the

Japanese Whaling Association combined whale with its Japanese character for "Whaling Review."

American table. The issue is emotional and patriotic, not culinary.

Whale-meat fans, the \$50-million-a-year whaling industry, and their sympathizers, which includes most of the country, are angered by what they believe is the moral judgment of anti-whale eaters and by the

political bullying of Uncle Sam.
The Japanese believe that the IWC and the United States have overlooked scientific data on the strength of the whale popula-tion because of heavy pressure from the anti-whaling lobby.

The popularity of whale as a national

dish has re-surfaced - at least at the Kujiraya which held a crowd of enthusiastic diners on a recent Friday night.

Although people of all ages and occupa-tions come to Kujiraya for whale, according to Kiyoo Tanahashi, its 52-year-old owner-manager, that night the customers were young men and women who flock to the trendy Shibuya district where the restaurant is located. The Kujiraya caters mostly to Japanese, but foreigners also seek it out to experience the taste of whale. The meat is both exotic and bland, dis-

tinctive or disturbing depending on its preparation. In bars, whale is sometimes served as an appetizer with beer or sake. At the Kujiraya there are also several appetiz-

deni, soy sauce-treated bits of boiled whale, a bowl of smoked whale meat which tastes like beef jerky, slices of rubbery whale bacon which executives favor with rice for lunch, and the strangest selection on the menu, sarashi kutira, slices of whale tail boiled white, served cold, and covered with a sharp yellow sauce. Almost tasteless, it must be chewed. Grimly.

"It's something the teeth enjoy," laughed

The king of appetizers is an expensive plate of thin-sticed whale sashimi, the delicate raw meat, which Tanahashi calls "gourmet quality." It is imported from Iceland while the usual akaniku (red meat) which the restaurant uses comes from the Minke whale caught in the Antarctic. Fried whale and whale barbecue, two

main courses, are widely popular with adults and with children, who are still occasionally fed fried whale in primary schools for lunch. Served with a salad of cabbage and sliced cucumbers, the whale is cooked tempura-style, covered with a light batter and fried quickly after being soaked in soy sauce, suger, and sake. The result is oishi

Those who eat whale meat for the first time," said Tanahashi, "like the fried best. There's no resistance.

Whale meat should be cooked like this in a barbecue," Tanahashi gestured to the meat, onions, and mushrooms sizzling on a grill. "Eat it a bit rare and it's tender."

Foreigners prefer the barbecue, he added, while Japanese choose whale cooked in sukiyaki, a grilled dish in which the meat and several vegetables simmer, and shabu shabu, a kind of stew.

Tanahashi has had to pay 10 percent more for his supply of whale meat this year. Prices on his menu have also gone up 10 percent, but they are still moderate. A family of four can eat at the Kujiraya for about 10,000 yea, or about \$40, according to owner Tanahashi. At lunchtime there are daily specials of fried whale or whale steak served with rice and soup which cost about \$4. In business since 1955, Kiyoo Tanahashi

makes a surprising admission when asked if he likes whale meat: "Not very much," he smiles, "but I always test the new meat when it comes in.

"Eating whale meat is more popular in Osaka, western Japan, or Kyushu, in the south, than in Tokyo. That's where the good at expressing ourselves in an internawhale culture really exists since they are closer to the historic ports. There are still several whale restaurants in those districts.

Megumi Ishikawa sits down to

a whale dinner at the Kuiiraya. In Tokyo it's impossible to catch or see

"As for profits, Kujiraya is the same as any restaurant, about average. It reflects

The whale consumed at Kujiraya comes only from the antarctic since the supply is available throughout the year. The season for Japan's coastal whaling runs from April to July, too brief and uncertain to depend on. Russia, the other big whaling country, sells most of its catch to Japan, Tanahaski said. In a freezer-locker at Tsukiji, Tokyo's huge fish market, Kujiraya has a four-year

supply of whale meat.
"If commercial whaling ends in 1988, as long as coastal whaling is allowed to continue, this restaurant will survive," Tanahashi said. "If we have to stop coastal whaling too, then we will have to change our line of business. "The situation is unreasonable. Why

should people outside Japan criticize our eating whale meat? I understand it if they think we are using up all of the whales, but that is contrary to scientific fact.

Irgentine Novelist Vins Cervantes Prize

The Argentine novelist Emesto Sabato, who headed the state commission on missing persons appointed by President Radi Alfonsin, will receive Spain's Mignei de Cervantes literary prize. The com-mission produced evidence implicating the Argentine security forces in the disappearance of some 9,000 people. Sabato, 73, wrote his major novel "Sobre Heroes y Tumbas" (Of Heroes and Graves) in 1961. King Juan Carlos will present the 10-million peseta (about \$60,000) award next April 23. 

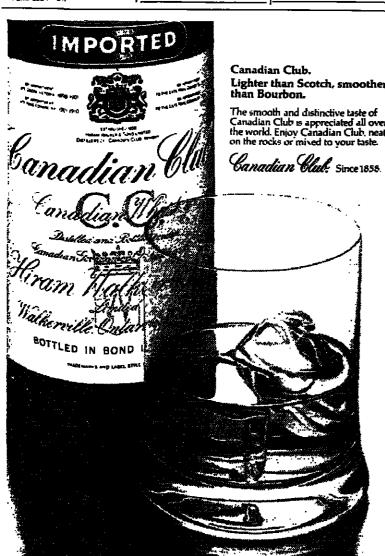

The millionaire American businessman Gilbert Kaplan was cheered by the audience but panned by critics for his debut conducting the London Symphony Orchestra and Chorus. The crowd at London's Royal Festival Hall gave Kapian, 44, publisher of Institu-tional Investor, a standing ovation Sunday night for his performance of Mahler's Symphony No. 2, "Resurrection," with which he acknowledged he is obsessed. Kaplan has taken lengthy lessons in conducting memorized the 209-folio score and performed the symphony three times before. But critic Meirion Bowen, writing in the Guardian, found the performance "wood-en and lifeless." It showed a "lack of vital energy" for The Daily Tele-graph's Robert Henderson.

The anthor Robert Lucium and John Patrick, a former friend who filed a lawsuit accusing the spy novelist of stealing his idea for the book "The Road to Gandolfo," reached an out-of court settlement Monday, attorneys said. Details were not made public, but the settlement was said to be substantially less than the \$500,000 that Patrick, who won a Pulitzer Prize for the 1954 play, "Teahouse of the August Moon," has asked for. . . The mime Marcel Marceau has been awarded \$236,700 by a Toronto judge for breach of contract by a Canadian film company. Marceau had signed a contract with Toronto's Cinequity Corp. to produce a film about Jewish children in a concentration camp after the company assured him it had reached a production agreement with Czech authorities. However, the company maintained Czech authorities had denied permission for the film and later defaulted on payments to the
